API Reference

Service Resources

12/14/2025

Service Resources

Groups the Service resources.

- **End Event List:** List of the end events that your application can receive if a service, state, or task is terminated.

- **Extension:** JSON extension for the service API.

- **State Transition Event:** Your application can receive this event if a service performs a transition between two states.

- **Service:** The service resource, which is a container for nested states and tasks.

- **State:** The state resource.

- **Start Event List:** List of the start events that your application can receive if a service, state, or task is started.

- **Task:** The task resource.
