IRD to Composer Migration

Application Variables

12/19/2025

Application Variables

IRD to Composer Migration will only support local scoped variables. Migration of IRD application variables of scope local will migrate to Composer's Entry block Variables property.

Important

Starting with IRD 8.0.1, additional variable scopes were introduced that do not exist within the Orchestration platform. Currently, and for the foreseeable future, Orchestration only supports LOCAL scoped variables as these map directly to variables that can be created within SCXML.
