Composer Help

Plugin Installation

Plugin Installation

When installing plugins into Composer, you may have to add an **update site** to Composer's installation preferences.

1. Go to **Window > Preferences**.
2. Select **Install/Update > Available Software Sites**.
3. Ensure that the Galileo Eclipse Version update site is present
4. If the version update site is not present, add it. The URL for the location is:

[http://download.eclipse.org/releases/\\$EclipseVersionName\\$](http://download.eclipse.org/releases/$EclipseVersionName$) where EclipseVersionName is galileo, juno, kepler, and so on).
