## Composer Help

[XML Preferences](#)

## XML Preferences

You can also set XML File Preferences for both routing and voice applications: **Window > Preferences > XML > XML Files**. When specifying Encoding formats in the XML Preference page: encoding formats are applicable only for new File creation using the Template option: (**File > New > XML > XML File > Create XML File from an XML Template > Select XML Template**). This applies only to new XML, VXML, CCXML and SCXML files. Existing files within the Project will not get impacted.
