Release ASR Engine Block

Release ASR Engine Block

Contents

- **1 Release ASR Engine Block**
 - 1.1 Name Property
 - 1.2 Block Notes Property
 - 1.3 Engine Name Property
 - 1.4 Condition Property
 - 1.5 Logging Details Property
 - 1.6 Log Level Property
 - 1.7 Enable Status Property

Use the Release ASR Engine block to control when the ASR engine(s) being used in the current session will be released. The Release ASR Engine block has the following properties: The Release ASR Engine block has no page exceptions.

Name Property

Find this property's details under [Common Properties](#).

Block Notes Property

Can be used for both callflow and workflow blocks to add comments.

Engine Name Property

The optional Engine Name property specifies the name(s) of the ASR engine(s) to release. If no engine is specified, all open ASR engines will be released. To specify an ASR engine to release:

1. Select the Engine Name row in the block's property table.
2. In the Value field, type the name of the ASR engine to release.

Condition Property

Find this property's details under [Common Properties for Callflow Blocks](#).

Logging Details Property

Find this property's details under [Common Properties for Callflow Blocks](#).

Log Level Property

Find this property's details under [Common Properties for Callflow Blocks](#).

Enable Status Property
