Search Syntax

12/19/2025

Search Syntax

Searching the UCS database uses the Lucene syntax, described at http://lucene.apache.org/core/3_6_0/queryparsersyntax.html.

Some samples follow.

`FirstName:kristin*`

This query searches for all records having a key FirstName whose value is any word starting with "kristin."

`FirstName:Kim AND LastName:Brown AND EmailAddress:hotmail`

This query searches on three attributes: FirstName containing "Kim," LastName containing "Brown," and EmailAddress containing "hotmail."

`Text:complain*`

This query searches for all records having an attribute Text which contains words starting with "complain."

Important

The first character of the search must not be * (asterisk) or ? (question mark).
