## Genesys Pulse Help

Introducing Pulse

# Introducing Pulse

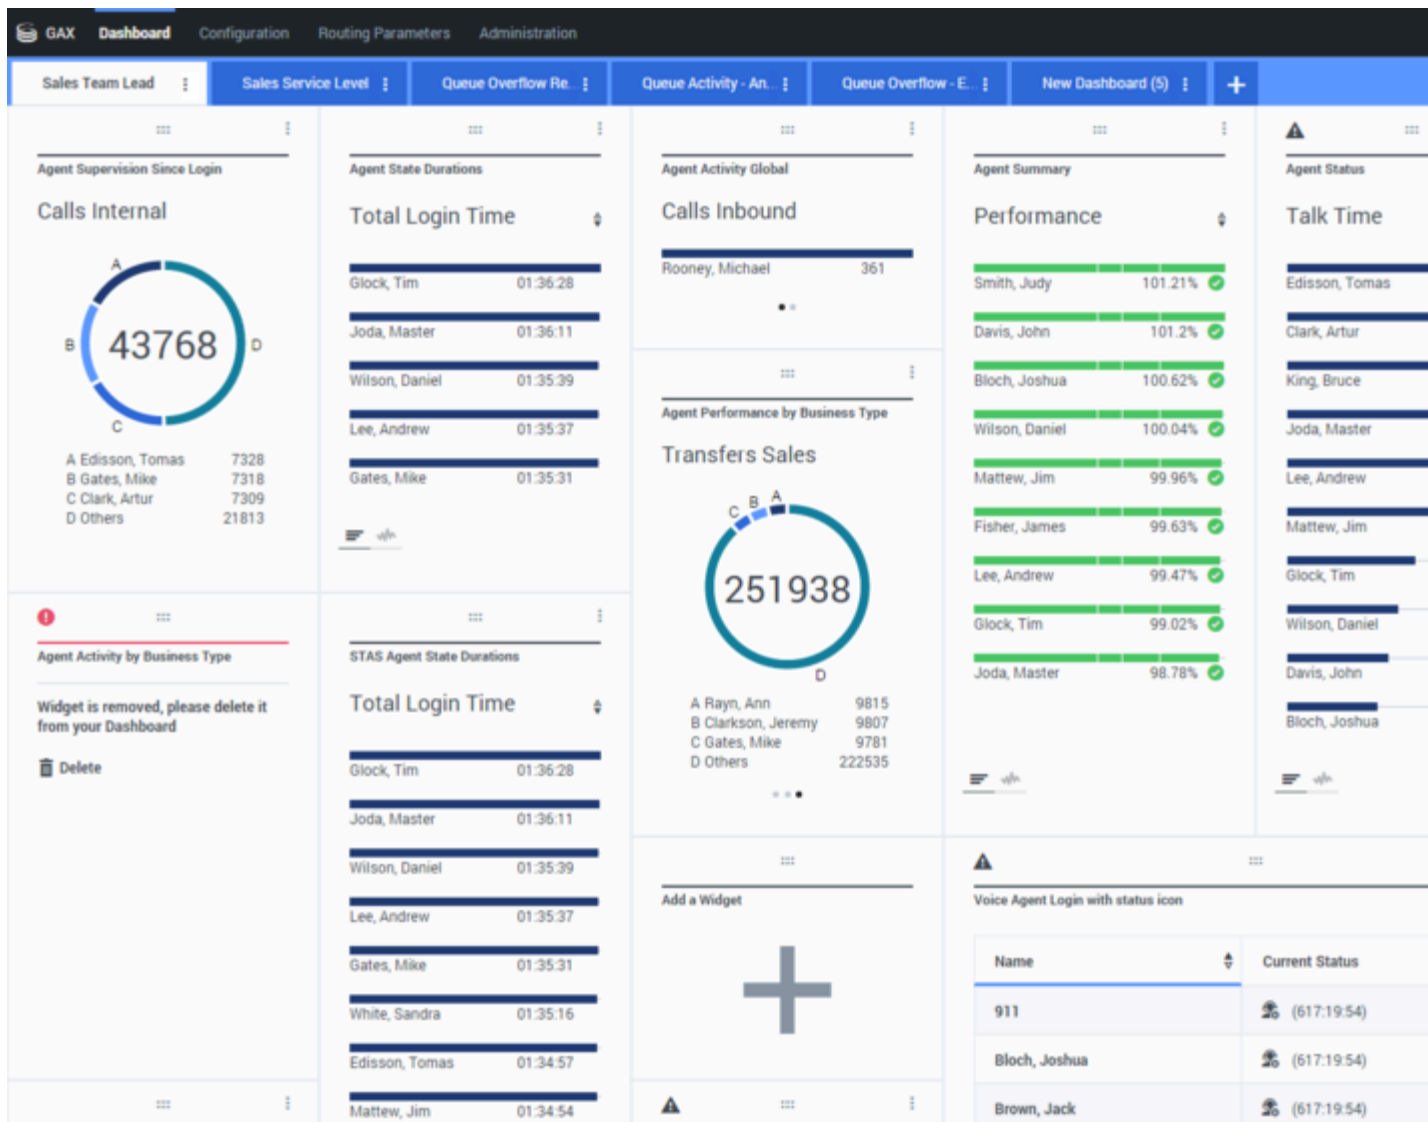

Genesys Pulse is a widget-driven, graphical user application, which is accessible from a web browser as a Genesys Administrator Extension (GAX) plug-in application. Using a direct communication link to a real-time metrics engine, Stat Server, Genesys Pulse enables at-a-glance views of real-time contact center statistics within the GAX user interface.

The tabs below provide a quick visual representation of some of the Pulse functionality and a list of the Genesys-provided templates.
