# Configurations Options Reference Manual

[license] Section

4/24/2025

## [license] Section

You must configure the License section for Solution Control Server when you use the following functionality:

- Redundant configurations—either warm standby or hot standby—for any Genesys server that the Management Layer controls.
- SCS support for geographically distributed configuration environments.
- Simple Network Management Protocol (SNMP) interface.

This section must be called **license**.

The only configuration option in the License section is called **license-file**, and this is the Genesys unified licensing option. Refer to the *Genesys Licensing Guide* for the option description and values.
