Configurations Options Reference Manual

Solution Control Server Configuration Options

4/25/2025

Solution Control Server Configuration Options

This chapter describes configuration options for Solution Control Server (SCS) and includes the following sections:

- [Setting Configuration Options](#)
- [Mandatory Options](#)
- [\[license\] Section](#)
- [\[general\] Section](#)
- [\[mailer\] Section](#)
- [\[snmp\] Section](#)
- [\[log\] Section](#)
- [Transport Parameter Options](#)
- [Configuring ADDP Between SCS and LCA](#)
- [Changes in 8.5.x](#)

Solution Control Server also supports:

- The common options described in the [Common Configuration Options](#) chapter.
- The autostart configuration option that you configure in other server applications and that Solution Control Server processes. Refer to the [Management Layer User's Guide](#) for more information.

Setting Configuration Options

Unless specified otherwise, set the Solution Control Server configuration options in the options of the Solution Control Server Application object, using the following navigation path:

- Solution Control Server Application object > Options tab > Advanced View (Options)

Warning

Configuration section names, configuration option names, and predefined option values are case-sensitive. Type them in Genesys Administrator exactly as they are documented in this chapter.

Mandatory Options

You do not have to configure any options to start Solution Control Server.
