Configurations Options Reference Manual

Transport Parameter Options

12/19/2025

Contents

- 1 Transport Parameter Options
 - 1.1 transport Option

Transport Parameter Options

Set options in this section in the Transport Parameters of the properties of the port used for the connection to Message Server, using the following navigation path in Genesys Administrator:

- Solution Control Server Application object > Configuration tab > General section > Connections > Connection to Log Message Server > Connections Info > Advanced tab > Transport Parameters

transport Option

Collectively, the options make up the parameters of the transport option. When entering the options in Genesys Administrator, only the options are required; transport = is prefixed automatically to the list of option/value pairs.

Important

Valid values for these options must have no spaces before or after the delimiter characters “;” (semi-colon) and “=”.

alarms-port

Default Value: 0 (zero)

Valid Values: A valid port number

Changes Take Effect: After restart of Solution Control Server.

Specifies the port number of a client-side port that will be used for the subscription connection from Solution Control Server to the primary Log Message Server.

backup-alarms-port

Default Value: 0 (zero)

Valid Values: A valid port number

Changes Take Effect: After restart of Solution Control Server.

Specifies the port number of a client-side port that will be used for the subscription connection from Solution Control Server to the backup Log Message Server.
