Management Framework Migration Guide

Published: June 8, 2018

9.x Management Framework is part of 9.x, which can include component releases from both 9.1.x, 9.0.x, and 8.5.x code streams. See **Management Framework** to check which component releases are part of 9.x.

Use this guide to introduce you to the concepts and terminology relevant to the Genesys Framework, and procedures to install, configure, and run Management Framework. Use this guide to upgrade Management Framework and database schema to 9.0, if required.

Overview

- Compatibility
- Feature Availability, by Component
- Required Database Schema to Support Available Feature
- Secure Protocols Compatibility

Upgrade Components

- Interoperability
- Local Control Agent
- Management Layer Server Components
- Configuration Server (and Roll Back)

Upgrade Component Definitions

- Loading Latest Locale
- Updating the Configuration Database Locale

Upgrade DB Schema

- Updating the Configuration Database Schema
- Upgrading the Centralized Log Database Schema
- Converting the Configuration Database from Single Tenant Format

Convert Configuration Environments

Converting Single-language Environment to a Multi-language Environment

Converting Single-tenant Configuration Database to a Multi-tenant Database

Cross-DBMS conversion (converting from one DBMS to another DBMS)

Localized Environments

Upgrading Localized Database

Updating Single-language Database With the Latest Language Definitions

Adding and Updating Languages in Multi-language Databases

Migrate to Net-SNMP

Adding Net-SNMP Functionality to a Configuration

Converting Genesys SNMP Master Agents to Net-SNMP Master Agents

Enable New Functionality

New and Changed Configuration Options by Release

Mandatory Changes in Configuration of Framework Components

Mandatory Changes in Secure Protocol Configuration

Configuration Conversion Wizard (CCW)

Installing CCW

Specifying the Database Connection

Using CCW to Migrate Your Configuration Database or Locale
