# Twitter

Twitter, a popular online social networking and micro-blogging service, lets you send and read text-based messages called Tweets. These messages are posted to a person's Twitter feed, sent to their followers, and are found on Twitter by searching.

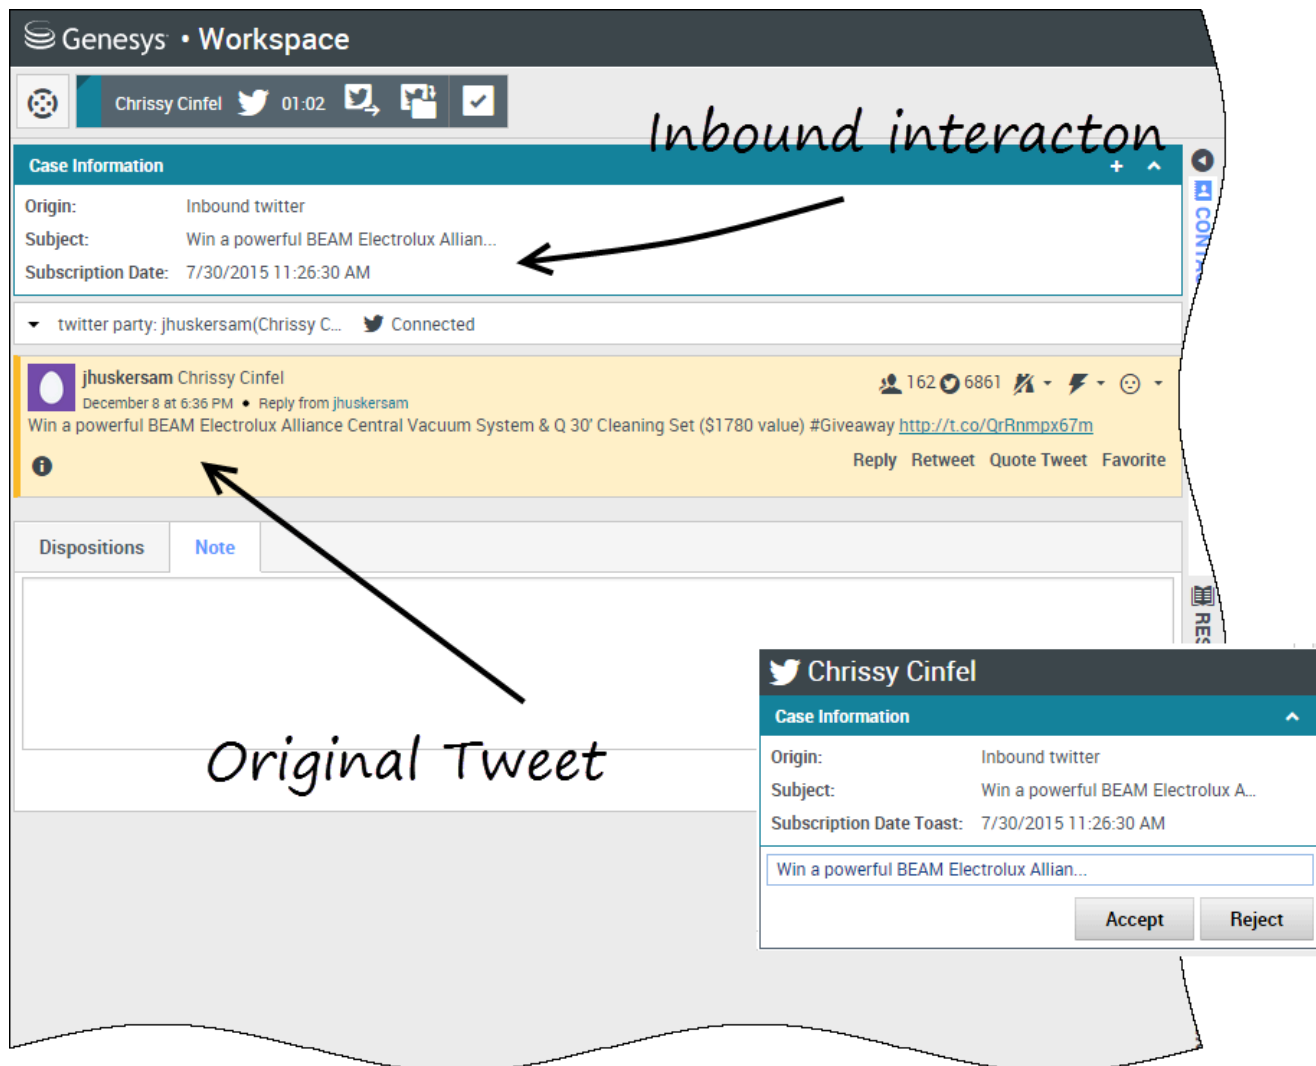

Twitter also has a suite of advertising products to help brands and businesses promote their content within the Twitter experience. Businesses can use Tweets to reach Twitter users while they search for their interests on Twitter.

**Note:** You cannot attach files or pictures in your comments.

## How do I handle a Twitter interaction?

When a new inbound Twitter interaction is sent to your workstation, a preview of the interaction is displayed in the bottom right-hand corner of your desktop.

If you accept, the inbound Twitter interaction view is displayed and the original-routed Tweet appears in the left margin under the Twitter interaction toolbar.

Select **Reply**, or select the down arrow after **Reply**.

Your message is displayed to the contact on Twitter. Your message is also added to the transcript area of the Twitter interaction view.

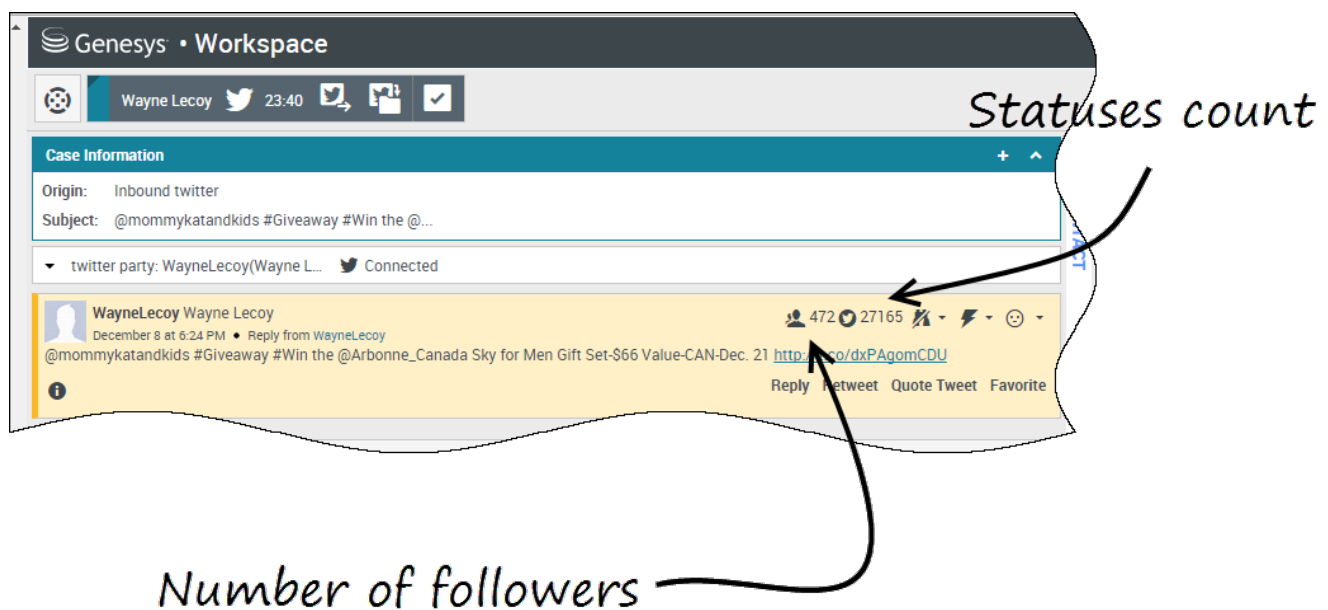

To view your Twitter contact's profile information, select the **Show Info** icon or click the username to

open the Twitter page that contains the user's profile information.

Some of the things you can do while handling a Twitter interaction include:

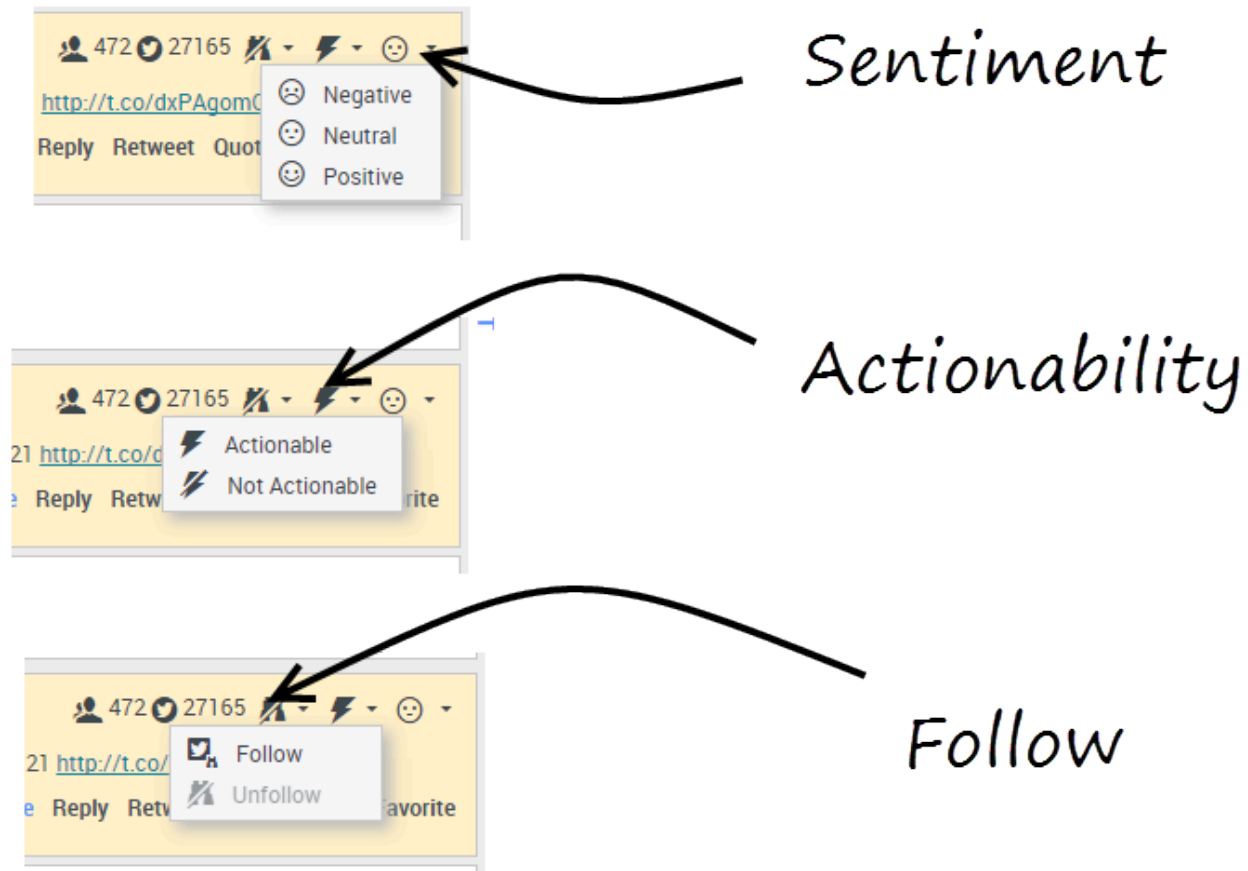

- Transfer the interaction to someone else in your company.
- Start a chat conference with yourself, the customer, and someone else in your company.
- Start a voice (internal targets and contacts) or chat (an internal target only) **consultation**. If you want to perform a warm transfer or a two-step transfer, click Consult to talk to the consultation target and then click Transfer to transfer the call.
- **Call** or **email** the contact, if there is a phone number or email address in the contact database. (You can also launch a call or email from the chat transcript area by clicking an email address or phone number.)
- **Respond with another media channel**, such as voice or email.
- Reply with a **Standard Response**.
- Add a **disposition code** or **note**.
- End the interaction and mark it as done.

Display the number of your Twitter contact's Tweets and followers

The number after the **Statuses Count** icon indicates the number of user Tweets. You can also see how many followers the user has.

Display the actionability and sentiment

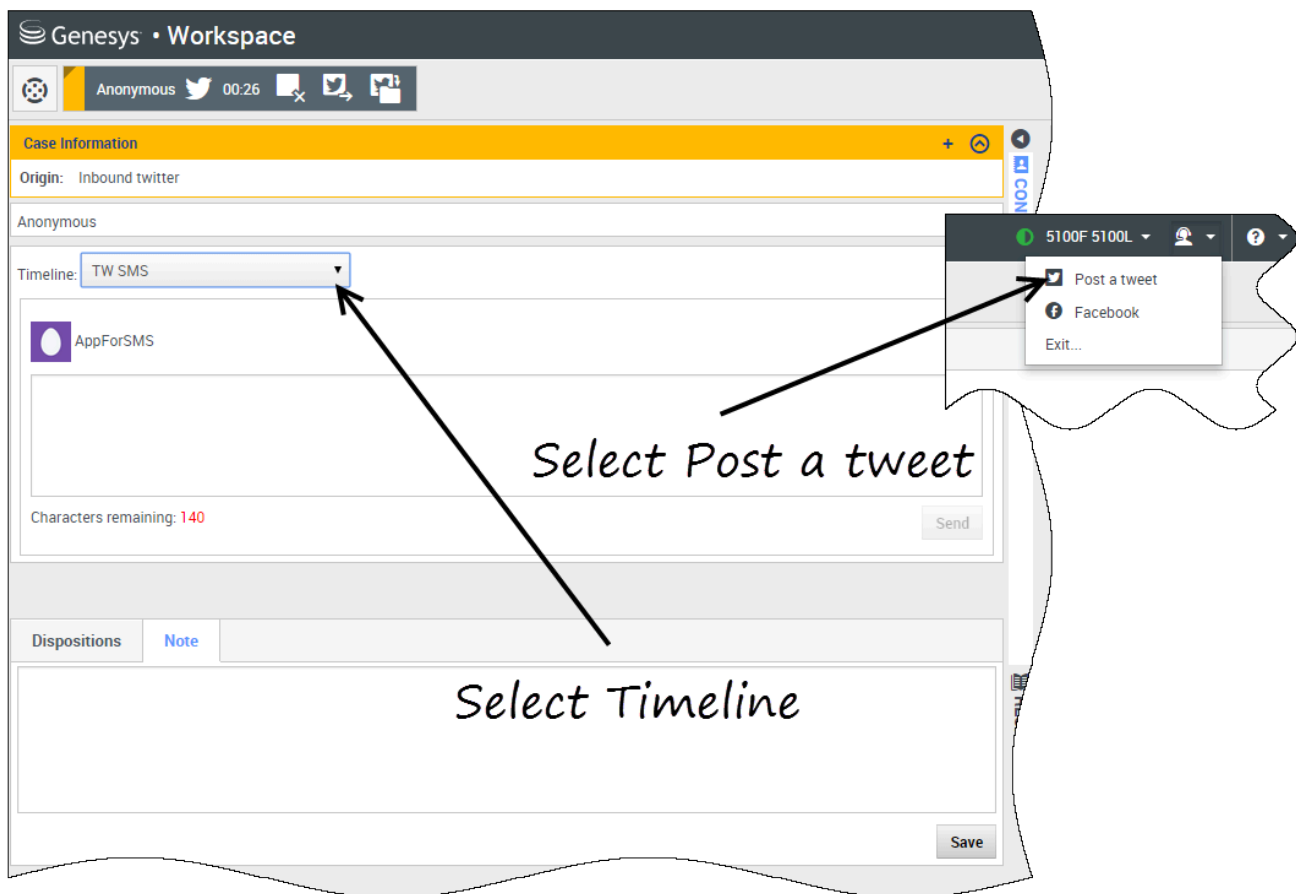

When a Twitter interaction arrives, you can view **Actionability** and **Sentiment** icons, which could have one of the following values:

- **Actionability** — Can be actionable, not actionable, or undeclared.
- **Sentiment** — Can be Positive, Negative, Neutral, or undeclared.

You can become or stop being a follower of an author of the Twitter message. Select the **Followed** button to unfollow the selected account.

## Post to Twitter

You can post a tweet to your Twitter contact's page. From the drop-down menu beside the **Agent** icon, select **Post a tweet**. Select the Timeline you want to post the tweet on. Type your message and send it to your contact.
