The following tables explain the prompts you can select when you generate the report, and the metrics and attributes that are represented in the report:

Prompts for the IVR Usage Report

Prompt	Description
Pre-set Day Filter	Choose from the convenient list of predefined rolling time ranges, spanning one day or more, over which to run the report.
Start Date	Choose the first day from which to gather data into the report.
End Date	Choose the last day from which to gather data into the report.

Attributes in the IVR Usage Report

Attribute	Description
Day (Appears only on the Daily report)	This attribute enables data within the reporting interval to be organized by a particular day.
Month (Appears only on the Monthly report)	This attribute enables data within the reporting interval to be organized by a particular month.
Region (Does not appear in the report by default, but you can add it if desired.)	This attribute enables data within the reporting interval to be organized based on the geographic classification of the call. Possible values include: us, eu, ap.
Business Unit (Does not appear in the report by default, but you can add it if desired.)	This attribute enables data within the reporting interval to be organized based on business unit.

Metrics in the IVR Usage Report

Metric	Description
IVR Minutes (Fmt)	The total number of minutes for all self-service applications used by GVP, for the specified tenant. This metric includes time spent in queue.
Peak IVR Ports	Peak usage of GVP treatment applied to calls within GVP, for the specified tenant.
