# Genesys Customer Experience Insights Project Guide

**Agent Metrics** 

# Agent Metrics

Use metrics in the Agent folder to build agent-related reports.

# Note the following:

- Unless other wise noted, metrics that show time, display a whole integer representing the number of seconds.
- For detailed information about the different metric types, see Project terminology and concepts.

# **Important**

Objects in each folder or subfolder are designed to be used together to create reports. Avoid mixing attributes and metrics from multiple folders into your reports. One exception to this rule is objects in the Time folder; Time attributes can be used in any report, and most reports include at least one attribute from the Time folder.

The following Metrics are available in this folder and are described on this page.

# **Agent**

# Folder: Agent

Metric name: Start Da	ate Time Key	Folder:
		Agent
<b>Description:</b> This metric is reserved for internal use to employ a key for a particular date and time from the AG2_AGENT, AG2_AGENT_GRP, or AG2_AGENT_QUEUE hierarchies.		
Source or Calculation: AG2_A AG2_AGENT_GRP[*].DATE_TIME AG2_AGENT_QUEUE_[*].DATE_T	_KEY,	Used in:
Media type: All  Data type: Number Metric type:		This metric is not used in any reports.
>> Back to list		

# Folder: Agent > Activity

Metric name: % Abandoned Inviting	Folder:
	Agent > Activity
<b>Description:</b> The percentage of interactions that entered the contact center, were distributed to a resource, and subsequently abandoned while alerting/ringing at an agent's DN. This count includes short-abandoned interactions, and relies on the value of the short-abandoned threshold as configured in the <b>[agg-gim-thld-ID-IXN]</b> section.	
<b>Source or Calculation:</b> Calculated based on the Abandoned Inviting and Offered Business Attribute metrics.	Used in:
Media type: Voice, Chat,	This metric is not used in any reports.

Open (sync)

Data type: Number Metric type: Disposition

>> Back to list

Metric name: % Transfer Initiated

Folder:
Agent > Activity

Description: The description of this metric depends on attributes and filters in the report query:

• Agent Attribute: The percentage of accepted customer interactions that were transferred (warm or blind) by this agent.

• Agent Group Attribute: The percentage of accepted customer interactions that were transferred (warm or blind) by agents who belong to this agent group.

<b>Source or Calculation:</b> Calculated based on the Transfer Initiated and Accepted Activity metrics.	Used in:

# **Metric name: Accepted Thread**

# Folder:

Agent > Activity

**Description:** The description of this metric varies depending on attributes and filters in the report query:

- Agent Attributes: The total number of customer-interaction threads that were accepted, pulled, or initiated for the first time by this agent.
- Agent Group Attributes: The total number of customer-interaction threads that were accepted, pulled, or initiated for the first time by agents who belong to this agent group.

This metric includes an agent's first participation in outbound replies to inbound interactions, and, for media other than email, yields the same values as the metric Accepted Unique.

<b>Source or Calculation:</b> AG2_AGENT_[*].ACCEPTED_THREAD, AG2_AGENT_GRP_[*].ACCEPTED_THREAD	Used in:

Metric type: Disposition	

# >> Back to list

# **Metric name: Actionability**

## Folder:

Agent > Activity

**Description:** The description of this metric varies depending on attributes and filters in the report query:

- Agent Attributes: The total score, assigned to interactions that were handled by this agent, that measures the degree to which interactions required agent attention.
- Agent Group Attributes: The total score, assigned to interactions that were handled by agents who
  belong to this agent group, that measures the degree to which interactions required agent attention.

This metric includes an agent's first participation in outbound replies to inbound interactions, and, for media other than email, yields the same values as the metric Accepted Unique. See Configuring Social Media User Data in the Genesys CX Insights User's Guide for more information.

# Metric name: Agent Disconnect First Folder: Agent > Activity

**Description:** The value presented in this metric varies depending on the attributes and filters used in a report:

- Agent Attribute: For voice interactions, the total number of times during the reporting interval that this agent released customer interactions before the other party did. For multimedia interactions, serves as a flag to indicate whether the interaction was stopped by one of the parties or by some outside entity (for example, Interaction Server or a Media Server).
- Agent Group Attribute: For voice interactions, the total number of times during the reporting interval that agents from this group released customer interactions before the other party did. For multimedia interactions, serves as a flag to indicate whether the interaction was stopped by one of the parties or by some outside entity (for example, Interaction Server or a Media Server).

The tally is incremented only when the system (such as the switch) provides such information.

Source or Calculation: AG2_AGENT_[*].AGENT_DISCONNECT_FIRST, AG2_AGENT_GRP_[*].AGENT_DISCONNECT_FIRST	Used in:  • Agent Conduct Report

>> Back to list	

# Metric name: Avg Consult Received Warm Time

### Folder:

Agent > Activity

**Description:** The value presented in this metric varies depending on the attributes and filters used in a report:

- Agent Attribute: The average amount of time that this agent was engaged as a recipient in collaborations or consultations, including related hold durations, where the collaborations/ consultations were associated with customer interactions.
- Agent Group Attribute: The average amount of time, in seconds, that agents who belong to this agent group were engaged as a recipient in collaborations or consultations, including related hold durations, where the collaborations/consultations were associated with customer interactions.

This metric is attributed to the interval in which the consult interaction is offered to the receiving agent. This metric excludes alert (ring) and ACW (Wrap) durations associated with the consult interactions.

Source or Calculation: Calculated based on the Consult
Received Warm Time and Consult Received Accepted Warm
Activity metrics.

>> Back to list		

# Metric name: Avg Consult Received Wrap Time

### Folder:

Agent > Activity

**Description:** The value presented in this metric varies depending on the attributes and filters used in a report:

- Agent Attribute: The average amount of time that this agent was in ACW (Wrap) state following simple consultations that the agent accepted, where the consultations were associated with customer calls.
- Agent Group Attribute: The average amount of time that agents who belong to this agent group were
  in ACW state following simple consultations that the agents accepted, where the consultations were
  associated with customer calls.

This duration does not stop if the agents received or made calls while in ACW state. This metric is attributed to the interval in which this agent was offered the consult interaction for which ACW was invoked.

<b>Source or Calculation:</b> Calculated based on the Consult Received Wrap Time and Consult Received Wrap Activity metrics.	<ul><li>Used in:</li><li>Agent Performance Dashboard</li></ul>
Media type: Voice  Data type: Number Metric type: Disposition	<ul><li>Agent Report</li><li>Agent Utilization Report</li></ul>

Metric name: Consult Received Warm Hold

Folder:

Agent > Activity

**Description:** The description of this metric varies according to the attributes and filters in the report query:

• Agent Attribute: The total number of consultations that this agent had on hold where the consultations were associated with customer interactions, the agent was the recipient of the consultation requests,

and the interactions were transferred to or conferenced with the agent.

 Agent Group Attribute: The total number of consultations that agents, who belong to this agent group, had on hold where the consultations were associated with customer interactions, the agents were the recipients of the consultation requests, and the interactions were transferred to or conferenced with the agents.

Source or Calculation:  AG2_AGENT_[*].CONSULT_RCV_WARM_HOLD,  AG2_AGENT_GRP_[*].CONSULT_RCV_WARM_HOLD	Used in:
Media type: Voice	This metric is not used in any reports.
Data type: Number Metric type: Disposition	
>> Back to list	

# Metric name: Consult Received Warm Time | Folder:

Agent > Activity

**Description:** The description of this metric varies according to the attributes and filters in the report query:

- Agent Attribute: The total amount of time that this agent was engaged as a recipient in collaborations or consultations, including related hold durations, where the collaborations/consultations were associated with customer interactions.
- Agent Group Attribute: The total amount of time that agents who belong to this agent group were
  engaged as a recipient in collaborations or consultations, including related hold durations, where the
  collaborations/consultations were associated with customer interactions.

This metric is attributed to the interval in which the consult interaction is offered to the receiving agent. Time begins when the consult interaction is received and ends when the customer interaction is transferred to or conferenced with this agent. This metric excludes alert (ring) and ACW (Wrap) durations associated with the consult interactions.

Source or Calculation: Calculated as the sum of
AG2\_AGENT\_[\*].CONSULT\_RCV\_WARM\_ENGAGE\_TIME and
AG2\_AGENT\_[\*].CONSULT\_RCV\_WARM\_HOLD\_TIME, or
AG2\_AGENT\_GRP\_[\*].CONSULT\_RCV\_WARM\_ENGAGE\_TIME and

Metric name: Offered Folder:

Agent > Activity

**Description:** The total number of times that interactions were received or initiated by this agent (for Agent reporting), or agents who belong to this agent group (for Agent Group reporting).

The count includes interactions that were abandoned while inviting, handling attempts that the agent rejected, and warm consultations and conferences that the agent received. This count excludes simple consultations, whether they were initiated or received. For AGT\_AGENT\_QUEUE records, this metric relies on the value of the **short-abandoned threshold** as configured in the **[agg-gim-thld-ID-IXN]** section.

# Folder: Agent > Detail > Session

<b>Metric name: Active Time</b>	Folder:	
	Agent > Detail > Session	
<b>Description:</b> The total amount of time that elapsed between the beginning and end of this agent's login session(s) on a particular media channel, irrespective of the intervals in which the resource session occurs. If an agent logs into multiple DNs, login duration is measured from the moment at which the agent logs in to the first DN to the moment at which the agent is no longer logged in to any DN. If the agent's session was still active when the data was compiled, the agent's session duration appears as null in the reports.  If the agent is not forcibly logged out when the calendar dates ends, login duration is split over both days.

Metric name: Offered		Folder:
		Agent > State and Reason > Interaction State
<b>Description:</b> The total number of times that interactions were received or initiated by this agent (for Agent reporting), or agents who belong to this agent group (for Agent Group reporting).		
The count includes interactions that were abandoned while inviting, handling attempts that the agent rejected, and warm consultations and conferences that the agent received. This count excludes simple consultations, whether they were initiated or received. For AGT_AGENT_QUEUE records, this metric relies on the value of the <b>short-abandoned threshold</b> as configured in the <b>[agg-gim-thld-ID-IXN]</b> section.

#### **Metric name: Active Time**

#### Folder:

Agent > State and Reason > Summarized State

**Description:** The total amount of time that elapsed between the beginning and end of this agent's login session(s) on a particular media channel, irrespective of the intervals in which the resource session occurs. If an agent logs into multiple DNs, login duration is measured from the moment at which the agent logs in to the first DN to the moment at which the agent is no longer logged in to any DN. If the agent's session was still active when the data was compiled, the agent's session duration appears as null in the reports.

If the agent is not forcibly logged out when the calendar dates ends, login duration is split over both days.
