# Genesys Info Mart Physical Data Model for a Microsoft SQL Server Database

Table [SDR\\_SURVEY\\_QUESTIONS\\_I1](#)

# Table SDR\_SURVEY\_QUESTIONS\_I1

## Description

**Introduced:** 8.5.007. Supported in certain Genesys Engage cloud deployments only.  
**Modified:** 8.5.010 (in Microsoft SQL Server, data type for the IQ\* columns modified in single- and multi-language databases)

In partitioned databases, this table is not partitioned.

This dimension table enables Session Detail Record (SDR) facts to be described based on custom survey questions IQ1-IQ5. The capital letter (I) preceding the digit in the table name indicates that an integer response is expected.

### Important

**Note for customers using Data Export Capability:** If the target database for exported Info Mart data is hosted on Microsoft SQL Server in your deployment, and if you use a Genesys-provided **update\_target\_\*.sql** script to create or update the target schema, be aware of the following consideration: Starting with Genesys Info Mart release 8.5.014.34, the sizes of some columns in this table in the Microsoft SQL Server target database differ from what is documented on this page.

### Tip

To assist you in preparing supplementary documentation, click the following link to download a comma-separated text file containing information such as the data types and descriptions for all columns in this table: [Download a CSV file](#).

**Hint:** For easiest viewing, open the downloaded CSV file in Excel and adjust settings for column widths, text wrapping, and so on as desired. Depending on your browser and other system settings, you might need to save the file to your desktop first.

## IQ4

**Modified:** 8.5.010 (in Microsoft SQL Server, data type modified in single- and multi-language databases)

**Based on KVP:** survey\_iQ4

Integer-response question 4.

## IQ5

**Modified:** 8.5.010 (in Microsoft SQL Server, data type modified in single- and multi-language databases)

**Based on KVP:** survey\_iQ5

Integer-response question 5.

## CREATE\_AUDIT\_KEY

The surrogate key that is used to join to the CTL\_AUDIT\_LOG control table. The key specifies the lineage for data creation. This value can be useful for aggregation, enterprise application integration (EAI), and ETL tools--that is, applications that need to identify newly added data.

## Index List

CODE	U	C	Description
I_SDR_SURVEY_QUESTIONS_I1			Improves access time, based on the CREATE_AUDIT_KEY value.

## Index I\_SDR\_SURVEY\_QUESTIONS\_I1

Field	Sort	Comment
IQ1	Ascending
