Genesys Info Mart Physical Data Model for an Oracle Database

Table [SDR_SURVEY_S2](#)

Table SDR_SURVEY_S2

Description

Introduced: 8.5.005. Supported in certain Genesys Engage cloud deployments only.
Modified: 8.5.010 (in Microsoft SQL Server, data type for the SQ* columns modified in single- and multi-language databases)

In partitioned databases, this table is not partitioned.

This dimension table enables Session Detail Record (SDR) facts to be described based on responses to survey questions SQ6-SQ10. The capital letter (S) preceding the digits in the table name indicates that a string response is expected.

Important

Note for customers using Data Export Capability: If the target database for exported Info Mart data is hosted on Microsoft SQL Server in your deployment, and if you use a Genesys-provided **update_target_*.sql** script to create or update the target schema, be aware of the following consideration: Prior to Genesys Info Mart release 8.5.014.34, the sizes of some columns in this table in the Microsoft SQL Server target database differ from what is documented on this page.

Tip

To assist you in preparing supplementary documentation, click the following link to download a comma-separated text file containing information such as the data types and descriptions for all columns in this table: [Download a CSV file](#).

Hint: For easiest viewing, open the downloaded CSV file in Excel and adjust settings for column widths, text wrapping, and so on as desired. Depending on your browser and other system settings, you might need to save the file to your desktop first.

Column List

Legend

Column	Data Type	P	M	F	DV
ID	NUMBER(10)	X	X		
SQ6	VARCHAR2(255 CHAR)		X		NO_VALUE
SQ7	VARCHAR2(255 CHAR)		X		NO_VALUE
SQ8	VARCHAR2(255 CHAR)		X		NO_VALUE
SQ9	VARCHAR2(255 CHAR)		X		NO_VALUE
SQ10	VARCHAR2(255 CHAR)		X		NO_VALUE
CREATE_AUDIT_KEY	NUMBER(19)		X	X	

ID

The primary key of this table.

SQ6

Modified: 8.5.010 (in Microsoft SQL Server, data type modified in single- and multi-language databases)

Based on KVP: survey_sq6

The answer from the caller to string-response question 6.

SQ7

Modified: 8.5.010 (in Microsoft SQL Server, data type modified in single- and multi-language databases)

Based on KVP: survey_sq7

The answer from the caller to string-response question 7.

SQ8

Modified: 8.5.010 (in Microsoft SQL Server, data type modified in single- and multi-language databases)

Based on KVP: survey_sq8

The answer from the caller to string-response question 8.

SQ9

Modified: 8.5.010 (in Microsoft SQL Server, data type modified in single- and multi-language databases)

Based on KVP: survey_sQ9

The answer from the caller to string-response question 9.

SQ10

Modified: 8.5.010 (in Microsoft SQL Server, data type modified in single- and multi-language databases)

The answer from the caller to string-response question 10.

CREATE_AUDIT_KEY

The surrogate key that is used to join to the CTL_AUDIT_LOG control table. The key specifies the lineage for data creation. This value can be useful for aggregation, enterprise application integration (EAI), and ETL tools--that is, applications that need to identify newly added data.

Index List

CODE	U	C	Description
I_SDR_SURVEY_S2	X		Improves access time, based on the CREATE_AUDIT_KEY value.

Index I_SDR_SURVEY_S2

Field	Sort	Comment
SQ6	Ascending	
SQ7	Ascending	
SQ8	Ascending	
SQ9	Ascending	
SQ10	Ascending
