View SKILL

Description

Allows facts to be described by the attributes of a skill. Each row describes one skill. A new row is issued for each configured skill, identified by its ID in the contact center configuration. Changing a skill name causes an update to an existing row. Deleting a skill and re-creating it under the same name causes a new row to be issued.

Column List

Column	Description
SKILL_KEY	The primary key of this view and the surrogate key that is used to join the SKILL dimension to the fact tables.
TENANT_KEY	The surrogate key that is used to join the TENANT dimension to the fact tables.
SKILL_NAME	The skill name.
CREATE_AUDIT_KEY	The surrogate key that is used to join to the CTL_AUDIT_LOG control table. The key specifies the lineage for data creation. This value can be useful for aggregation, enterprise application integration (EAI), and ETL tools — that is, applications that need to identify newly added data.
UPDATE_AUDIT_KEY	The surrogate key used to join to the CTL_AUDIT_LOG dimension. Specifies the lineage for data update. This value can be useful for aggregation, enterprise application integration (EAI), and ETL tools — that is, applications that need to identify recently modified data.
SKILL_CFG_DBID	The skill object identifier in the contact center configuration.
START_TS	The UTC-equivalent value of the date and time when the skill was added to IDB, which may differ from when the skill was actually added to contact center configuration.
END_TS	The UTC-equivalent value of the date and time when the skill was removed from contact center configuration.
