# Contents

# Match-interaction

## Overview

This service will do the following for **ALL** Services:

- It looks through all the services for one that matches the input criteria.

- only the service id (session id) and data id will be returned to the requester.

- The service will always release, the matched service access information will be unreserved (access resources returned).

**Note:** The user of this service must use the Storage APIs to retrieve any data that was associated with the matched service.

## Create Request Data

These are the service specific parameters that will be supplied on the Create service API.

| Parameters | Mandatory | Description |
| --- | --- | --- |
| _phone_number | No | This is the phone number of the party that is calling and will be matched against the _phone_number property of the services. |
| _access_number | Yes | This is the number that the party called and will be matched against the _access_number property associated with the services. |
| _access_code | No | This is the code assigned to the party that is calling will be matched against the _access_code property assigned to the services. |

## Create Response Data

| Parameters | Mandatory | Description |
| --- | --- | --- |
| _id | Yes | This is the id of the matching service. |
| _data_id | Yes | This is the id of the matching service's data that is in GMS Storage. |
