# Office Hours Tab

## Important

- You must set up Office Hours if you want to implement **Scheduled Callback** and **Disposition Dialog**.
- Office Hours are used when requesting Callback API to create an immediate or a scheduled callback. See [Start or Schedule a Callback](#) for more information.

## Upload the Office Hours Template

In the **Services and Tools > Tools > Service Templates** tab, make sure that the **Office Hours** template is available. Otherwise, click **Upload** to add the office-hours.zip to the **Templates** list.

## Create the Office Hours Service

The screenshot displays the 'Office Hours' configuration interface. The sidebar on the left contains a search bar, '+ Create', 'Delete', and a list of items: 'Office Hours', 'business-hours', 'exceptions', and 'hours1'. The main content area shows the 'business-hours' configuration. At the top, there's a 'Regular Office Hours' checkbox and a 'Today' button. Below this is a 'Calendar' tab and a 'Table' tab. The 'Calendar' tab is active, showing a weekly view from Monday to Friday. The 'Table' tab shows a table with columns for 'Time', 'Monday', 'Tuesday', 'Wednesday', 'Thursday', and 'Friday'. The 'Time' column lists times from 'All Day' to '12 PM'. The 'Monday' through 'Friday' columns show 'Regular Office Hours' from '8:00 AM - 12:00 PM'. Annotations include: 1. 'Edit settings to fix calendar timezone issues' pointing to the 'Settings' button. 2. 'Create Office Hours' pointing to the 'Create' button in the sidebar.

| Time    | Monday                                     | Tuesday                                    | Wednesday                                  | Thursday                                   | Friday                                     |
|---------|--------------------------------------------|--------------------------------------------|--------------------------------------------|--------------------------------------------|--------------------------------------------|
| All Day |                                            |                                            |                                            |                                            |                                            |
| 1 AM    |                                            |                                            |                                            |                                            |                                            |
| 2 AM    |                                            |                                            |                                            |                                            |                                            |
| 3 AM    |                                            |                                            |                                            |                                            |                                            |
| 4 AM    |                                            |                                            |                                            |                                            |                                            |
| 5 AM    |                                            |                                            |                                            |                                            |                                            |
| 6 AM    |                                            |                                            |                                            |                                            |                                            |
| 7 AM    |                                            |                                            |                                            |                                            |                                            |
| 8 AM    | Regular Office Hours<br>8:00 AM - 12:00 PM | Regular Office Hours<br>8:00 AM - 12:00 PM | Regular Office Hours<br>8:00 AM - 12:00 PM | Regular Office Hours<br>8:00 AM - 12:00 PM | Regular Office Hours<br>8:00 AM - 12:00 PM |
| 9 AM    |                                            |                                            |                                            |                                            |                                            |
| 10 AM   |                                            |                                            |                                            |                                            |                                            |
| 11 AM   |                                            |                                            |                                            |                                            |                                            |
| 12 PM   |                                            |                                            |                                            |                                            |                                            |

Click **Create** in the **Office Hours** tab, select office-hours in the filter and configure the business-

hours service.

## Set your Calendar Timezone

The screenshot shows a 'Settings' dialog box with a close button (X) in the top right corner. The settings are as follows:

- Show All Day Row**: ☒ On
- Popovers**: ☒ On
- Checkbox**: ☒ On
- Time Interval per Block**: 00:30:00 (dropdown arrow)
- First Day of the Week**: Sunday (dropdown arrow)
- Office Timezone**: UTC (dropdown arrow)
- Display Timezone**: UTC (dropdown arrow)

A blue rectangular box highlights the 'Office Timezone' and 'Display Timezone' sections.

The **Display Timezone** is the timezone of your **Calendar** view and is set to the Browser timezone by default. The **Office Timezone** is bound to the `_timezone` parameter of the Office Hours service.

The **Calendar** view is in Read-Only mode if your Display Timezone and Office Timezone are different. In that case, the interface shows a warning message and does not allow you to edit the **Calendar** view.

### [+] Show me the message

 The calendar is in read-only mode because the office timezone is not equal to the displayed timezone

To fix this issue, click **Settings** and fix your **Office Timezone** and **Display Timezone** by setting identical timezones.

## Add Office Hours to your Callback Service

The screenshot shows the 'Callback Delayed' configuration page. At the top, there is a search bar labeled 'Search Table' and a 'Select All' button. Below these are action buttons: '+ Add New', 'Delete', 'Advanced Parameters' (toggle), 'Expand All', and 'Refresh'. The main table has three columns: 'Name', 'Value', and 'Description'. The 'General' category is expanded, showing several parameters. The '\_business\_hours\_service' parameter is selected, and a dropdown menu is open showing 'Business-hours' as the chosen value. Other visible parameters include '\_attach\_udata' with value 'single\_json', '\_call\_direction' with value 'USERTERMINATED', and '\_capacity\_service'.

| Name                                                        | Value                      | Description                                                                                                                                                                                                                                                                                                                                                                                      |
|-------------------------------------------------------------|----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Chat (1)</b>                                             |                            |                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>General (18)</b>                                         |                            |                                                                                                                                                                                                                                                                                                                                                                                                  |
| _attach_udata                                               | single_json                | Specifies the format in which the user data should be attached to the interaction prior to routing to agent. Select data_id to attach only the storage data_id (key: GMS_UserData). Select single_json will attach all user data as one json object (key: GMS_UserData). Select separate_keys to attach each user data as a separate key. Name of the key will be the same as the user data key. |
| <input checked="" type="checkbox"/> _business_hours_service | Choos...<br>Business-hours | Specifies a configured office-hours service. Request Desired Time is verified against the defined regular and specific calendar hours.                                                                                                                                                                                                                                                           |
| _call_direction                                             | USERTERMINATED             | When value is USERORIGINATED, this implies the user (device) will initiate the call to be connected to the agent. If USERTERMINATED is specified, then the enterprise will initiate the call to the specified target.                                                                                                                                                                            |
| <input type="checkbox"/> _capacity_service                  |                            | Specifies a configured capacity service. Agent availability is defined capacity and capacity                                                                                                                                                                                                                                                                                                     |

Select your Callback Service and expand the **General** category. Find the `_business_hours_service` parameter and select your Office Hours instance in the drop down list.

## Create Regular Office Hours

The screenshot shows the 'Business-hours' configuration page. At the top, the 'Regular Office Hours' checkbox is checked and circled with a handwritten '1'. Below this, a calendar view shows office hours for Monday through Friday. A handwritten note 'Select your Office Hours' with an arrow points to the 'Regular Office Hours' checkbox. Another handwritten note '2' with an arrow points to the 'Regular Office Hours' service in the calendar view. A small inset window shows the 'New Office Hours' dialog.

| Time  | Monday                                    | Tuesday                                   | Wednesday                 | Thursday                                  | Friday                                    |
|-------|-------------------------------------------|-------------------------------------------|---------------------------|-------------------------------------------|-------------------------------------------|
| 1 AM  |                                           |                                           |                           |                                           |                                           |
| 2 AM  |                                           |                                           |                           |                                           |                                           |
| 3 AM  |                                           |                                           |                           |                                           |                                           |
| 4 AM  |                                           |                                           |                           |                                           |                                           |
| 5 AM  |                                           |                                           |                           |                                           |                                           |

| 1 PM  |                                           |                                           |                           |                                           |                                           |
| 2 PM  |                                           |                                           |                           |                                           |                                           |
| 3 PM  |                                           |                                           |                           |                                           |                                           |
| 4 PM  |                                           |                                           |                           |                                           |                                           |
| 5 PM  |                                           |                                           |                           |                                           |                                           |
| 6 PM  |                                           |                                           |                           |                                           |                                           |
| 7 PM  |                                           |                                           |                           |                                           |                                           |

Select your Office Hours service in the **Configured Service** tab.

In the **Calendar** view, make sure that **Regular Office Hours** is checked.

Select your Office Hours service in **Configured Services**. You can add Office Hours by selecting a timezone in your **Calendar** view; the Office Hours interface shows up. Or, you can switch to the **Table** view and edit options there.

## Switch Views to Check Office Hours

If you add Office Hours to one or more days in the week, the results apply to all months and weeks. Switch to the **Month** view to see the actual Office Hours of the month.

## Add Holidays and Exceptions

The screenshot displays the 'Business-hours' configuration interface. At the top, there is a 'Business-hours' tab with a sub-tab 'Regular Office Hours' circled in red. A handwritten arrow points to this tab with the text 'Uncheck'. Below the tab, there is a date selector showing 'May 11, 2016' and a 'Today' button. A 'Settings' gear icon is also present. The main area shows a calendar view for 'Wednesday 05/11'. A handwritten arrow points to a specific day in the calendar with the text 'Click on a specific day in your calendar to Add Holiday or Exception'. A 'New Office Hours' dialog box is open, showing options for 'Block Type' (Holiday or Exception), 'This is an Annual Event', and a list of 'Weeks Selected' for the period '01/09/2023 - 01/15/2023'. The dialog box has 'Cancel' and 'Create' buttons.

Cancel Create

You can set certain dates as Holidays so they will not be used for Callback and certain dates as Exceptions (or Special Office Hours) for days that require additional hours.

To add these special events, uncheck the **Regular Office Hours** parameter, then click in the **Calendar** view on the appropriate date to open the dialog box. By default, the special event is added to the current year.

Create

When you create the holiday or the exception, if you select the **This is an Annual Event** option, the holiday or exception is planned annually, not only for the current year.

## Exceptions Always Apply

The screenshot shows a 'Business-hours' calendar for May 2016. The interface includes tabs for 'Calendar' and 'Table', a date range from May 1, 2016, to May 31, 2016, and a 'Today' button. A 'Settings' gear icon is also present. The calendar is set to 'Month' view. The days of the week are listed at the top: Monday, Tuesday, Wednesday, Thursday, and Friday. The calendar grid shows dates from 2 to 31. Each date has a 'Regular Office Hour' block (8:00 AM - 5:30 PM) and a 'Holiday' block. A 'Special Office Hour' block is also shown for May 25, 2016. Handwritten annotations include 'No Callback on Holiday' with an arrow pointing to the 'Holiday' block on May 11, and 'Special Office Hours (Exception)' with an arrow pointing to the 'Special Office Hour' block on May 25. The 'Special Office Hour' block is highlighted with a red border.

| 12<br>Regular Office Hou                     | 13<br>Regular Office Hou | 14<br>Regular Office Hou           | 15<br>Regular Office Hou                       | 16<br>Regular Office Hou |
| 17<br>Regular Office Hou                     | 18<br>Regular Office Hou | 19<br>Regular Office Hou           | 20<br>Regular Office Hou                       | 21<br>Regular Office Hou |
| 22<br>Regular Office Hou                     | 23<br>Regular Office Hou | 24<br>Regular Office Hou           | 25<br>Special Office Hou<br>Regular Office Hou | 26<br>Regular Office Hou |
| 27<br>Regular Office Hou                     | 28<br>Regular Office Hou | 29<br>Regular Office Hou           | 30<br>Regular Office Hou                       | 31<br>Regular Office Hou |

If you set a Holiday and an Exception on the same day, then the Exception applies. The office is opened during the hours configured in the Exception.

If Regular Hours, Holiday, and Exception are set on the same day, then Holiday blocks Regular Hours, but the Exception still applies and the office is opened during the Exception's hours.

## Add Holidays and Exceptions from the Table view

The screenshot shows the 'Business-hours' configuration interface in 'Table' view. At the top, there are tabs for 'Calendar' and 'Table', with 'Table' being the active view. Below the tabs, there is a search bar labeled 'Search Table' and a 'Select All' button. A toolbar contains icons for 'Clone', 'Delete', a toggle for 'All Parameters', 'Expand All', and 'Refresh'. The table has two columns: 'Value' and 'Description'. The first row is 'UTC' with a description about timezone matching. The second row is 'Holidays (1)' with a copy icon. The third row is '5/11/2016' with a description about office closure dates. The fourth row is selected and shows a date picker for '5/19/2016' with a checkmark and an 'x' button. A calendar for 'May 2016' is open, showing the date '19' selected. The fifth row is 'Special Office Hours (1)' with a copy icon.

| Value                                         | Description                                                                                   |
|-----------------------------------------------|-----------------------------------------------------------------------------------------------|
| <input type="checkbox"/> UTC                  | Timezone matching days of week and time range definition. Defaults to UTC.                    |
| ▼ Holidays (1)                                |                                                                                               |
| <input type="checkbox"/> 5/11/2016            | Days when the office will be closed. Use syntax '{yyyy-MM-dd}'. For example _holiday5='07-15' |
| <input checked="" type="checkbox"/> 5/19/2016 | Days when the office will be closed. Use syntax '{yyyy-MM-dd}'. For example _holiday5='07-15' |
| ^                                             |                                                                                               |
| ^                                             |                                                                                               |
| ^                                             |                                                                                               |
| ^                                             |                                                                                               |
| ^ Special Office Hours (1)                    |                                                                                               |

You can also add Holidays and Exceptions by editing the associated options in the **Table** view. If you do not check the Annual Event option, the holiday or exception is added to the current year.

## Add Holidays and Exceptions from the Table view

The screenshot shows the 'Business-hours' interface in 'Table' view. At the top, there's a search bar and a 'Select All' button. Below are action buttons: 'Clone', 'Delete', 'All Parameters' (toggle), 'Expand All', and 'Refresh'. The table has two columns: 'Value' and 'Description'. The first row is 'UTC' with a description about timezone matching. The second row is 'Holidays (1)'. The third row is '5/11/2016' with a description about office closure dates. The fourth row is selected, showing '5/19/2016' in the 'Value' column and the same description. A calendar dropdown is open for the date input, showing May 2016 with the 19th selected. The fifth row is 'Special Office Hours (1)'.

You can also add Holidays and Exceptions by editing the associated options in the **Table** view.

## Import Rules in Office Hours

The **Import Rules** feature enables you to set up Regular Hours, Holidays, and Exceptions (Special Office Hours) that you want to apply to several Office Hours services. The imported content (options and setup) becomes part of the Office Hours service.

- Further changes to the imported services (Regular Hours, Holidays, Exceptions) instantly apply to all the Office Hours services that imported the rules.
- The **Import Rules** feature ignores the timezones defined in the imported service.

## Tip

The **Import Rules** feature allows you to create and manage a single Office Hours, Holidays, and Exceptions calendar that is applicable to multiple team calendars.

### Use Case: Import Holiday Rules

Let's consider that you have several offices in the United States, sharing the same federal holidays and vacations. In that scenario, you can create a dedicated Office Hours called **Federal USA Holidays**, and then import it in your U.S. offices, instead of manually adding the same holidays to your **Calendar** views for each service (Office New York and Office SFO in the example below).

### Use Case: Import Exception Rules

Let's consider that, every two weeks during spring, all of your offices are opened on Wednesday evenings from 6-9 p.m. for a special event called *Special Deal*. In that scenario, you can create an Office Hours service called **Special Deal Events** where you create the needed extra hours. Then, you can import this rule in each concerned office (Office New York, Office SFO, and Office Amsterdam in the example below).

Note that **Special Deal Events** will apply even if Regular Hours and Holiday are set for a given date, as explained [above](#).

## Set up Rules in a Dedicated Office Hours Service

The screenshot displays the 'Office Hours' management interface. On the left, a sidebar lists various office hours services: 'All Offices', 'Federal USA Holidays', 'Office Amsterdam', 'Office New York', 'Office SFO', and 'Special Deal Events' (which is highlighted). The main area shows the 'Special Deal Events' rule configuration. At the top, there's a search bar and a dropdown menu. Below that, a toggle switch for 'Regular Office Hours' is visible. The date range is set from 'May 1, 2016' to 'May 31, 2016'. A 'Today' button and a 'Settings' gear icon are also present. The calendar view is set to 'Month' and 'GMT+0200'. The calendar grid shows days of the week (Monday to Friday) and dates. Two 'Special Office Hour' events are highlighted on Wednesday, May 18th and May 25th, indicating the 'Special Deal' event.

| Monday | Tuesday | Wednesday                 | Thursday | Friday |
|--------|---------|---------------------------|----------|--------|
| 2      | 3       | 4                         | 5        |        |
| 9      | 10      | 11                        | 12       | 13     |
| 16     | 17      | 18<br>Special Office Hour | 19       | 20     |
| 23     | 24      | 25<br>Special Office Hour | 26       | 27     |
| 30     | 31      | 1                         | 2        |        |
| 6      | 7       | 8                         | 9        |        |

To set up these rules, **create** a new Office Hours service. In this example, two services are created: Special Deal Events and Federal USA Holidays.

Regular Office Hours 7:00 AM - 5:30 PM

Special Office Hours 6:00 PM - 9:00 PM

Imported from Special Deal Events

Genesys Mobile Services 8.0.104.0

Switch to the **Calendar** view to display the results of the imports. In this example, you can see that the Special Deal Events and Federal USA Holidays are imported in the Office SFO service.

If you update an Office Hour service (for instance, Special Deal Events or Federal USA Holidays), you will see these updates replicated to the Office Hours services importing the modified calendars (here, Office SFO).

You can also click **Settings** and see the imported Offices Hours in the list of **Displayed Calendars**.

## Import Schedules in Office Hours

You can import **Schedules** from other Office Hours Services to combine working hours of multiple teams and shifts in the same Office Hours service. In this scenario, you can create a main Office Hours service (All Offices in the example below) into which you can import all the Office Hours schedules (Regular Hours, Holidays, Exceptions, and timezones). This results in the union of the imported Office Hours schedules within the timezone of the main Office Hours.

### Tip

The **Import Schedules** feature helps you to manage teams dispatched in different timezones.

## Import Schedules in Office Hours Service

The screenshot shows the 'All Offices' table view in the Office Hours service. The table has two columns: 'Value' and 'Description'. The rows are as follows:

| Value                                     | Description                                                                                                                                       |
|-------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> Europe/Paris     | Timezone matching days of week and time range definition. Defaults to UTC.                                                                        |
| ^ Holidays (0)                            |                                                                                                                                                   |
| ^ Imported Rule Calendars (0)             |                                                                                                                                                   |
| ▼ Imported Schedule Calendars (3)         |                                                                                                                                                   |
| <input type="checkbox"/> Office Amsterdam | An option that specifies an existing office hour to import into the current office. Note: The timezone of the imported office will be considered. |
| <input type="checkbox"/> Office New York  | An option that specifies an existing office hour to import into the current office. Note: The timezone of the imported office will be considered. |
| <input type="checkbox"/> Office SFO       | An option that specifies an existing office hour to import into the current office. Note: The timezone of the imported office will be considered. |

A handwritten arrow points from the 'Imported Rule Calendars (0)' section to the 'Office Amsterdam' entry, with the text 'Click, then select the Office Hours to import' written next to it. A small icon in the top right corner of the table is circled.

Switch to **Table** view and expand **Imported Schedule Calendars**. Click  to add a new rule line, then select the appropriate Office Hours service.

## Display Imported Schedules

Switch to the **Calendar** view to see the results of the imports.

In this example, the **All Offices** service combines the schedules of the **Office SFO**, **Office New York**, and **Office Amsterdam** services.

The timezones, Regular Hours, Holidays, and Exceptions are aggregated in the **Calendar** view that shows the callback coverage for the three offices.

You can also click **Settings** and see the imported Offices Hours in the list of **Displayed Calendars**.

## Office Hours Options Reference

For a list of Office Hours options, see the [Office Hours section](#) of the Genesys Mobile Engagement Options Reference Guide.
