Client Samples

iOS Sample

iOS Sample

Updated in 8.5.2

The screenshot shows the iOS Sample app interface. At the top, the status bar displays the time 3:28, signal strength, Wi-Fi, and battery icons. The app header features a red logo, the title "GMS Sample", and a blue headset icon. Below the header, there are several sections: "USER NAME / ID" with a "User name" field containing "userId" and a "Password" field with masked characters and a clear button; "SCENARIO" with a "Way to connect" dropdown set to "SERVER-DECIDE"; "PROBLEM" with an "Information Level" dropdown set to "FULLY-DEFINED"; "Content" with a dropdown set to "Problem Details"; and "App path" with a text field containing "/home/loans/123456/survey". At the bottom, there is a "PICTURE (BINARY DATA)" section and a navigation bar with icons for GMS, Log, Chat, Queue, and Settings.

GMS Log Chat Queue Settings

Important

The source code is downloadable in [BitBucket](#).

This sample application provides you with the following scenarios:

- Chat-Now
- Chat-Wait
- Voice-Now-UserOrig
- Voice-Now-UserTerm
- Voice-Wait-UserOrig
- Voice-Wait-UserTerm
- Voice-Scheduled-UserTerm

Notes:

- Log into the UI hub at this URL:
 <GMS Local Host>:8080/genesys
- Go to **Settings** and change the GMS service URL to point to the Callback service that you configured.
- The application does not trim +1 from the phone number. Make sure the phone number in the **Settings** tab is compatible with your test environment if you are using either matching by DNIS+ANI or matching by ANI only. Depending on your setup, T-Server reports ANI with or without a leading country code.
