Genesys Rules System Deployment Guide

Installing the GRAT Component

5/14/2025

Installing the GRAT Component

Contents

- **1 Installing the GRAT Component**
 - 1.1 Purpose
 - 1.2 Prerequisites
 - 1.3 Procedure

Purpose

To run the the installation package for the GRAT after the applications are configured in Configuration Manager.

Prerequisites

- [Configuring the Rules Repository Database](#)
- [Creating the GRAT Application Objects in Configuration Manager](#)

Procedure

1. From the host on which the GRAT is to be installed, locate and double-click **Setup.exe** in the **rulesauthoring** folder of the Genesys Rules System CD.
2. Click **Next** on the **Welcome** screen of the installation wizard.
3. Enter the connection parameters to connect to Configuration Server (**Host**, **Port**, **User name**, and **Password**).
4. On the **Client Side Port Configuration** screen, if you do not want to configure client-side port parameters, leave the checkbox empty and click **Next**. If you do want to configure these settings, select the checkbox to display to additional options: **Port** and **IP Address**. Enter values for these options and click **Next**.
5. Select the GRAT application that you created in [Creating the GRAT Application Objects in Configuration Manager](#). Click **Next**.
6. Specify the destination directory for the installation, or accept the default location, and click **Next**.
7. Enter the host and port of the optional backup Configuration Server and click **Next**.
8. Enter the number of times that the GRAT Server application should attempt to reconnect to Configuration Server (Attempts) and the amount of time (**Delay**) between attempts. Click **Next**.
9. On the screen that is shown in [Creating the GRAT Application Objects in Configuration Manager](#), specify the name of the rules authoring *client* application and click **Next**.

Specify the Rules Authoring Client Application Name

10. Select **Application Server Type**. Click **Next**.
11. Click **Install**.
12. Click **Finish**.

Next Steps

- Before using GRAT, you will need to set up users and roles. See **Role Task Permissions** and **Configuring a User** for more information.
