Creating the GRAT Application Object in Configuration Manager

Purpose

To create the Application objects in Configuration Manager that will link the GRAT with Configuration Server. The GRAT requires two applications in Configuration Server: a server application and a client application.

Procedure Summary

1. Import the GRAT application template for the server.
2. Import the GRAT application template for the client.
3. Configure the server application.
4. Configure the client application.

Import the GRAT application template for the server

To import the application template that is to be used for the server application:

1. In Configuration Manager, navigate to the **Application Templates** folder.
2. Right-click the **Application Templates** folder, and select **Import Application Template**.
3. Browse to the **templates** folder of the installation CD, and select the appropriate template for your version of Management Framework.
 - For Management Framework 8.1.1, select **Genesys_Rules_Authoring_Server_900.apd**.
 - For Management Framework 8.1 and earlier, select **Genesys_Rules_Authoring_Generic_Server_900.apd**.
4. Click **OK** to save the template.

Import the GRAT application template for the client

To import the template that is to be used for the client application:

1. Right-click the **Application Templates** folder.
2. Select **Import Application Template**.
3. Browse to the **templates** folder of the installation CD.

4. Select **Genesys_Rules_Authoring_Generic_Client_900.apd**.
5. Click **OK** to save the template.

Configure the server application

Configuration options are described [here](#).

Configure the client application

To configure the client application:

1. Right-click the **Applications** folder.
2. Select **New > Application**.
3. Select the **Genesys_Rules_Authoring_Generic_Client** template.
4. On the **General** tab, enter a name for the application, such as `Rules_Authoring_Client`.
5. Click **Save**.
