Genesys Rules Authoring Tool Help

[Copying Decision Tables](#)

Copying Decision Tables

You can copy a decision table and paste that copy in the same rule package, either on the same or a different node. Follow these steps to copy a decision table:

1. Navigate to the rule package to which the decision table belongs in the left navigation (verify that you have selected the correct Tenant from the **Tenant** drop-down list). Select the correct node (at which the rule was defined) and click the **Rules** tab.

Tip

You can also use the **Search** feature to locate rules.

2. Locate the decision table in the list, select it, and select **Copy Rule** from the **More** menu.
3. If you want the copy to be in the same node, click **Paste Rule**.
4. If you want the copy to be in a different node, select that node in the tree click the **Rules** tab, and click **Paste Rule**.

Important

If you wish to move the rule to another location, first copy, then paste, then go back and delete the original. The system will not allow you to paste a rule after it has been deleted from the repository.

5. Update the information as needed and click **Save**. Refer to **Creating Decision Tables** for details about the fields that can be updated.

When editing rules, be careful not to clear your browsing history or cookie data, as unsaved changes could be lost.
