SIP Voicemail Deployment Guide

Configuring the SIP Voicemail Server Application Object

5/2/2025

Configuring the SIP Voicemail Server Application Object

Prerequisites

- Both the Agent SIP Server and the GSVM SIP Server Application objects have been created in the configuration environment.

Start

1. In the SIP Voicemail Server Application object, on the Connections tab, add both the SIP Server Applications dedicated to managing agents and dedicated to GSVM.
 2. On the Advanced tab, in the Application Parameters dialog box, configure the following parameter only to the SIP Server dedicated to GSVM:
 - voicemail=true
- On the Options tab, in the VoicemailServer section, configure the following options:
 - [locale](#)
 - [security-account-lockout-duration](#)
 - [security-admin-access-group](#)
 - [security-password-length-min](#)
 - [voice-can-deposit-during-extended-absence](#)
 - [voice-enrollment-enabled](#)
 - [voice-message-max-duration](#)
 - [voice-mailbox-message-count](#)
 - [voice-record-path](#)

End

Return to the [Manual Deployment](#) task summary.
