SIP Voicemail Deployment Guide

Choose the right installation method for your environment - Complete Install or Manual Deployment - or access directly the configuration options for SIP Voicemail Server.

Choose Your Deployment

Complete Install

Genesys SIP Voicemail can be deployed using the SIP Voicemail Complete Install installation package on a single server.

 [Deployment Prerequisites](#)

 [SIP Voicemail Complete Install](#)

Manual Deployment

Genesys SIP Voicemail can also be deployed manually in a stand-alone mode using multiple servers. You can also deploy GSVM into an existing Genesys deployment consisting of Genesys Media Server and SIP Server.

 [Deployment Prerequisites](#)

 [Manual Deployment](#)

High-Availability Deployment

*Available starting in release **8.1.1***

Genesys SIP Voicemail can be deployed as part of a Solution HA scenario.

Configuration Options

Find detailed descriptions for all the configuration options available in the SIP Voicemail Server Application object.
