GVP Troubleshooting Guide

Stale Application Pages

12/19/2025

Stale Application Pages

The following example indicates that stale application pages are being picked. During the development mode, change the settings as shown:

1. For dynamic applications with jsp/aspx pages, set the expires immediately so that the latest copy of the pages is picked.
2. In production, upon redeploying the application, flush the Squid cache.
3. In the VoiceXML properties explicitly, set documentmaxage=1s.

Example:

```
appl_begin INIT_URL=http://10.10.30.235:8080/Test05042008/src-gen/  
Main.vxml%7CDEFAULTS=file:///C:/Program Files/GCTI/gvp/VP Media Control Platform 8.0/
