# GVP Deployment Guide

Configuring GVP

# Configuring GVP

Following installation, some Genesys Voice Platform (GVP) components require additional configuration to initiate the advanced features and optimize operation. Starting here: read about post-installation activities for the GVP hosts, as well as how to create the database and schema for the Reporting Server.

## Task Summary

**Task Summary: Post-Installation Configuration of GVP**

Objectives	Related Procedures and Actions
<b>Complete the post-installation configuration of GVP components</b>	<ol style="list-style-type: none"> <li>1. Integrate Application objects. See <a href="#">Procedure: Integrating Application Objects with Resource Manager</a>.</li> <li>2. Create server connections. See <a href="#">Procedure: Creating a Connection to a Server</a>.</li> <li>3. Provision and configure Speech Resource objects. See Provisioning Speech Resource Application Objects and <a href="#">Procedure: Assigning the MRCP Server to the Media Control Platform</a>.</li> </ol>
<b>Complete the post-installation configuration for the Reporting Server and database</b>	<ol style="list-style-type: none"> <li>1. <b>If you are installing GVP 8.1.2 or later on the Media Control Platform host</b>, use the following steps to configure the grammars:               <ol style="list-style-type: none"> <li>a. Change to the root user (su).</li> <li>b. Add the following lines to the file <code>/etc/httpd/conf/httpd.conf</code>:                   <pre>Alias /mcp/ "/var/www/gvp/mcp/" &lt;Directory "/var/www/gvp/mcp/"&gt; ExpiresActive On ExpiresDefault "now plus 5 minutes" Options Indexes MultiViews AllowOverride None Order allow,deny Allow from all &lt;/Directory&gt;</pre> </li> </ol> </li> <li>2. On the Apache Web Server (Linux only), modify the <code>/etc/mime.types</code> file. Type: <code>application/srgs+xml</code>.</li> <li>3. Configure the CTI Connector for Cisco ICM Integration. See <a href="#">Procedure:</a></li> </ol>

Objectives	Related Procedures and Actions
	<p data-bbox="607 310 1279 342">Configuring the CTI Connector for Cisco ICM Integration.</p> <ol style="list-style-type: none"> <li data-bbox="565 359 1414 443">4. Provision the PSTN Connector. See <a href="#">Procedure: Configuring the PSTN Connector</a>, and <a href="#">Procedure: Configuring a Trunk DN for the PSTN Connector</a>.</li> <li data-bbox="565 464 1406 575">5. Provision the Supplementary Services Gateway for outbound-call initiation. See <a href="#">Procedure: Provisioning the Supplementary Services Gateway</a>, and <a href="#">Procedure: Configuring DNs for the Supplementary Services Gateway</a>.</li> <li data-bbox="565 594 1446 898">6. Create DNs for the Supplementary Services Gateway:               <ol style="list-style-type: none"> <li data-bbox="607 638 1403 722">a. Create a Routing Point DN to use for outbound calls with the legacy GVPI (if required). See <a href="#">Procedure: Configuring a Routing Point DN</a>.</li> <li data-bbox="607 741 1446 800">b. Create a VoIP Service DN to initiate MSML dialogs (if required). See <a href="#">Procedure: Configuring a Voice Over IP Service DN</a>.</li> <li data-bbox="607 819 1442 898">c. Create a Voice Treatment Port (VTP) DN to play IVR Profile VoiceXML dialogs (if required). See <a href="#">Procedure: Configuring a Voice Treatment Ports DN</a>.</li> </ol> </li> <li data-bbox="565 919 1393 1010">7. (Optional) Install and configure security certificates to enable the Supplementary Services Gateway to interact with SIP Server over secure TLS ports. See Chapter 3 in the <a href="#">GVP 8.5 User's Guide</a>.</li> <li data-bbox="565 1029 1365 1087">8. Prepare the Call Control Platform to make a call. See <a href="#">Procedure: Configuring the Call Control Platform</a>.</li> <li data-bbox="565 1106 1430 1213">9. If you are deploying GVP 8.1.2 in a multi-tenant environment, create the child tenants in the hierarchy. To create child tenants manually or import multiple tenants from a file, see <a href="#">Genesys Administrator 8.1 Help</a>.</li> <li data-bbox="565 1232 1446 1457">10. If you are deploying GVP 8.1.3 or higher, and require Resource Manager High Availability, configure SIP static routing for MCP, CCP and CTI Connector to work with an Resource Manager pair in active HA mode. Set the [sip]transport.staticroutelist parameter to each Resource Managers IP address. For example, [sip]transport.staticroutelist=138.120.84.101, 138.120.84.102. Also: configure the Resource Managers in the same group to listen on the same port number.</li> <li data-bbox="565 1476 1390 1560">11. Group and configure the GVP resources, IVR Profiles, and DIDs for ease of management and administration. See <a href="#">Using Resource Groups</a>.</li> </ol> <div data-bbox="607 1591 1406 1791" style="background-color: #e6f2ff; padding: 10px; margin-top: 20px;"> <p><b>Tip</b></p> <p>Before you begin to plan and configure your GVP resources, there is important information you should know about tenant permissions and assigning DID Groups in multi-tenant environments. See <a href="#">HMT Permissions</a></p> </div>
