API Reference

`startChatInThisWindow(options)`

startChatInThisWindow(options)

Contents

- [1 startChatInThisWindow\(options\)](#)
 - [1.1 Description](#)
 - [1.2 Returned promise](#)
 - [1.3 Options](#)

Description

Use this method in a separate window ("popup" mode) to render a chat widget that occupies the whole page. Normally, if you use default provided `chatWidget.html`, you never have to use this method.

Returned promise

This method returns a promise similar to the one returned by [startChat](#).

Options

Most of the options are extracted from the URL, which is formed by the `startChat` method, if called to create a chat in "popup" mode. However, some options cannot be passed in the URL but must be passed directly. These include:

- [ui](#) — Use to pass an object with "hooks" to customize the built-in UI.
- [registration](#) — Use to pass a function with custom registration workflow.
- [transport](#) — Use in case you provide a custom transport.
- [logger](#)
