Get Information About Your Application

After you have started your Web Engagement Servers, you can explicitly request version information from them.

To get this information, you should send a GET HTTP request to the appropriate URL for the server.

URL: `http(s)://<web_engagement_server_host>:< web_engagement_server_port>/server/about`

Note: This image shows an example from Web Engagement Server 8.5.0. The information on your screen might differ from what is shown here.
