# VERSION

This method returns the current chat version, for example, 850.1.0.

Version consists of three parts:

1. The first part, 850 in the example, matches the general Genesys version. For example, chat shipped with Web Engagement 8.5.0 will always have version 850.X.X.
2. The second part, 1 in the example, is incremented after each major API change such as when a method is added.
3. The third part, 0 in the example, is incremented after minor changes and bug fixes.

## Important
