VERSION

This method returns the current chat version, for example, `850.1.0`.

Version consists of three parts:

1. The first part, `850` in the example, matches the general Genesys version. For example, chat shipped with Web Engagement 8.5.0 will always have version 850.X.X.

2. The second part, `1` in the example, is incremented after each major API change such as when a method is added.

3. The third part, `0` in the example, is incremented after minor changes and bug fixes.
