Web Services API Reference

[Create Setting](#)

Create Setting

This operation is part of the [User Settings API](#) section of the [Web Services API](#).

Overview

Creates a new setting in the specified group.

Request URL	/users/{id}/settings/{group-name} or /me/settings/{group-name}
HTTP Method	POST
Required Features	api-provisioning-write

Parameters

Parameter	Value
<key>	Specify the "key" attribute defined for the setting. If the "key" attribute was not specified when the setting was created, you should use the "name" attribute.
value	The value of the setting.
