# Web Services API Reference

[Get Settings](#)

# Get Settings

This operation is part of the [User Settings API](#) section of the [Web Services API](#).

## Overview

Returns an array of settings for the specified group.

<b>Request URL</b>	/users/{id}/settings/{group-name} or /me/settings/{group-name}
<b>HTTP Method</b>	GET
<b>Required Features</b>	api-provisioning-read

## Samples

### Request

GET /api/v2/settings/my-setting-group

### HTTP Response

#### Important

The "key" attribute specifies which of the settings attributes should be used as a key to identify the setting for modification requests. If the "key" attribute is not present, Web Services uses the "name" attribute.

```
{
  "statusCode": 0,
  "key": "name",
  "settings": [
    {
      "name": "My First Setting",
      "value": "red"
    },
    {
      "name": "My Second Setting",
      "value": "orange"
    }
  ]
}
```

```
} ]
```
