Spellchecker

spellchecker.corporate-dictionary

- Default Value: ""
- Valid Values: Comma-separated list of words.
- Changes take effect: When the application is started or restarted.
- Description: Specifies a comma-separated list of dictionary words that conform to the limitations of allowable characters in the Configuration Layer. Typically you would use this list to specify common words in your company, such as your company name or product name.

spellchecker.corporate-dictionary-file

Modified: 8.1.40x.xx

- Default Value: ""
- Valid Values: Absolute or relative path to a text file.
- Changes take effect: When the application is started or restarted.
- Description: Specifies the name and the path to your corporate dictionary file. The path can be relative to the Interaction Workspace working directory (for example: Dictionaries\CorporateDictionary.txt) or an absolute path (for example: C:\PathToDictionaries\CorporateDictionary.txt). The text file must consist of a list of words (one word per line). The file must be saved in UTF-8 encoding to avoid internationalization issues.
