# Workspace Desktop Edition Deployment Guide

Security privileges

5/10/2025

## Security privileges

The following table lists the Security privileges in the Workspace Security Privileges section of the Role Privileges tab that can be enabled for a role. Privileges are assigned as configuration options in the Role Privileges tab of the Role object in Genesys Administrator Extension (refer to the Procedure: [Creating a Role, allowing a Workspace privilege, and assigning a Role to an agent or agent group](#)).

**Security Privileges**

<b>Role privilege</b>	<b>Description</b>
Security - Can Manually Change Password	The agent is permitted to change their own password. This can be done by using a menu action, or it can be a requirement.
