# Callback

**Purpose:** To provide information about callback commands.

## Learn about Callback Commands

The commands in this page are restricted to callback operations. However, callback interactions are extended open media interactions and can be used as such in open media commands.

You can also use specific [Open Media](#) which apply to open media interactions in some GUI components.

### Important

Read [Use Customizable Commands](#) to see code snippets which demonstrate the usage of the commands.

## Managing Callback Interactions

Open media commands cover the following features (this list is not exhaustive):
