## Workspace Desktop Edition User's Guide

Blend Different Media Into A Single Conversation

5/8/2025

# Blend Different Media Into A Single Conversation

In this lesson, you will learn how to use the Interaction window to manage a conversation with a contact or other party by using different media types simultaneously.

Workspace enables you to blend more than one media type into your conversation. You can chat with a contact online, while simultaneously speaking together on the phone and composing an email message to send information in writing. You can also manage a conference call with a contact and an internal party, while simultaneously conducting an IM session with the internal party. You can receive a phone number or email address in an email, chat, SMS, or Social Media interaction, and then click it to launch a new interaction.

Workspace provides many ways to blend interaction media simultaneously. The following sections provide some examples of what you can do:

- Media Blending Overview
- Blending One Media with Another
- Blending an E-Mail Interaction with a Voice Interaction
- Blending a Voice Interaction with a Chat Interaction
- Blending Internal Voice Interactions and Internal IM Interactions
- Click to Blend

#### Tip

The procedures in this lesson demonstrate the principles of media blending; they do not show all the possible media-blending combinations.

## Media Blending Overview

Workspace enables you to handle multiple, related interactions in a single window, and transition from one media type to another within the same window.

For example, if you are handling a chat interaction with a contact, you can start an IM consultation in the same window, and then you can add an email interaction while you add a voice consultation.

When you are engaged in one or more consultations with another party, such as another agent or other internal target, Workspace displays a list of your active consultations (see the Team Communicator displaying active consultations figure) whenever you display the Team Communicator by clicking the Instant Transfer, Instant Conference, and Start Consultation buttons in the active interaction.

Active party Action menu displaying available media

The Action menu displays the media channels that are available for blending. The media that are

available depends on several factors, including which media are available in your environment, what contact information is available, and to which media channels you are logged in.

The Team Communicator also displays the Action menu for each party with whom you have an active consultation when you click the Start Consultation button.

Active Consultations Action menu in Team Communicator

## Blending an E-Mail Interaction with a Voice Interaction

You can email a contact or other party with whom you are engaged in a voice interaction. The opposite scenario is also possible; you can call a contact from an active E-Mail Interaction window.

Lesson: Blending an E-Mail interaction with a current Voice interaction

**Purpose:** To add a different type of media to an existing interaction.

#### **Prerequisites**

- You are logged in to Workspace (see Lesson: Logging in to Workspace).
- You have an active interaction with a contact (see Receiving a Voice Interaction).

#### Start

1. During a call with a contact you might want to send an email message to the contact. The Voice Interaction window (see the Voice Interaction Window figure) enables you to add an email interaction to the conversation in the same window.

## Blending Internal Voice Interactions and Internal IM Interactions

Workspace enables you to blend media during internal interactions, whether you are calling agent-toagent, or are consulting with another party while you are handling an interaction with a contact, you can add different media to your internal interactions.

This section contains the following procedures:

- · Lesson: Blending an internal IM with an active internal voice interaction
- Lesson: Blending an internal IM consultation with an active internal voice consultation.
- Lesson: Blending a voice consultation with an IM consultation.

#### Lesson: Blending an internal IM with an active internal voice interaction

**Purpose:** To add an internal IM interaction to an active internal voice interaction and handle both in the same window.

#### Prerequisites

- You are logged in to Workspace (see Lesson: Going Ready in the Workspace Main window).
- You have an active call with an internal target (see Lesson: Calling an internal target).

#### Start

 During a call with an internal target, you might want to blend an IM interaction into your conversation. The Voice Interaction window (see the Active voice interaction, with an internal target figure) enables you to add multiple conversations in the same window.

Active voice interaction, with an internal target

To add an IM interaction to your conversation, click the Party Action menu next to the name of your internal target and select Send Instant Message (see the Party menu in the active Voice Interaction window figure).

Party menu in the active Voice Interaction window

The IM interaction view is displayed in the active Voice Interaction window (see the Starting an IM interaction in the active interaction window figure).

 Enter a message to your target. The session starts in the interaction window (see the Starting an IM interaction in the active interaction window figure) when you send your first message. The target is presented with an interactive notification that enables the target to accept or reject your invitation to engage in an IM session.

You are notified if the target accepts, rejects, or lets your invitation time-out.

Message-transcript area of the IM interaction view

4. Complete your voice interaction by following Lesson: Calling an internal target. Complete your IM interaction by following Lesson: Initiating an Instant Messaging session. You can end either of the interactions while keeping the other active.

#### End

### Lesson: Blending an internal IM consultation with an active internal voice

#### consultation

**Purpose:** To add an internal IM consultation to an active internal voice consultation and handle both in the same window.

#### **Prerequisites**

- You are logged in to Workspace (see Lesson: Going Ready in the Workspace Main window).
- You have an active interaction with a contact (see Receiving a Voice Interaction).

#### Start

1. During a call with a contact you might want to start a voice consultation and then blend in an IM consultation. The Voice Interaction window (see the Voice Interaction Window figure) enables you to add multiple consultation conversations in the same window.

An Instant Messaging consultation added to the current voice consultation  $% \left( {{{\rm{A}}_{{\rm{B}}}}_{{\rm{A}}}} \right)$ 

- 5. Enter a message to your target. The session starts in the Interaction window (see the An Instant Messaging consultation added to the current voice consultation figure) when you send your first message. The target is presented with an interactive notification that enables the target to accept or reject your invitation to engage in an IM session. You are notified if the target accepts, rejects, or lets your invitation time-out.
- 6. If your target accepts your invitation, you can conduct an IM session by entering a text message to the internal target in the text field at the bottom of the view (see the An Instant Messaging consultation added to a voice consultation in the Interaction window figure). See the Lesson: Starting a Consultation IM session from an active interaction, for information on how to handle an IM interaction. See the Lesson: Starting a voice consultation, for information on how to handle a voice consultation.

Active Consultation Action menu

4. Click Start Voice Consultation (see the Active Consultation Action menu figure). The voice interaction view is displayed in the active interaction window beneath your active IM consultation view (see the A voice consultation added to the current IM consultation figure).

A voice consultation added to the current IM consultation

The target is presented with an interactive notification that enables the target to accept or reject your invitation to engage in a voice consultation.

You are notified if the target accepts, rejects, or lets your invitation time-out.

5. If your target accepts your invitation, you can speak with your voice consultation target. See the Lesson: Starting a voice consultation, for information on how to handle a voice consultation. See the Lesson: Starting a Consultation IM session from an active interaction, for information on how to handle an IM interaction.

End

## Click to Blend

Workspace can recognize phone numbers and email addresses in email, chat, and SMS interactions. When Workspace recognizes an email address or phone number in an interaction, it converts the information into a link. When you click a link, it can launch a new interaction.

Lesson: Creating a new email interaction by clicking an email address link in a

#### chat interaction

**Purpose:** To create a new email interaction by clicking an email address link in another interaction. The principles of this procedure are applicable to email links in chat, email, and SMS interactions.

#### **Prerequisites**

- You are logged in to Workspace (see Lesson: Going Ready in the Workspace Main window).
- You have an active chat, email, or SMS interaction.

#### Start

1. If you are handling a chat interaction (see Lesson: Handling an inbound chat interaction), and your contact sends you an email address in their message, Workspace will convert the email address to an address link (see the Chat interaction with a clickable email link from the contact figure). The link is underlined and highlighted in a color that is distinct from the other text.

Chat Interaction window containing an E-Mail Interaction view that was added by clicking an email address link in the chat transcript

- 3. Compose an email message to the recipient (Lesson: Creating and sending a new email interaction to a contact). The controls for the email interaction are displayed next to the chat controls (see the Chat Interaction window containing an E-Mail Interaction view that was added by clicking an email address link in the chat transcript figure).
- Click Send to send the email interaction to the address that you clicked. You can also click Save, Save In Draft workbin, Add Attachment, or Delete — see Creating and Handling a New or Reply Email Interaction.
- 5. Complete the chat interaction (see Lesson: Handling an inbound chat interaction).

#### End

Lesson: Creating a new voice interaction by clicking an phone number link in an SMS interaction

**Purpose:** To create a new voice interaction by clicking a phone number link in another interaction.

The principles of this procedure are applicable to phone number links in chat and SMS interactions.

#### Prerequisites

- You are logged in to Workspace (see Lesson: Going Ready in the Workspace Main window).
- You have an active chat or SMS interaction.

#### Start

1. If you are handling an SMS interaction (see Lesson: Handling an inbound SMS interaction), and your contact sends you a phone number in their message, Workspace will convert the phone number to a link (see the SMS interaction with a clickable phone number link from the contact figure). The link is underlined and highlighted in a color that is distinct from the other text.
