Record Interactions

In this lesson, you will learn how to use the call recording functionality of Workspace.

This lesson contains the following section:

- [Recording a Voice Interaction](#)

Recording a Voice Interaction

The Voice Recording functionality (for VoIP-/SIP-enabled agents only) enables you to record the current voice interaction with a contact or an internal target. You can start a recording, pause a recording, resume a recording, and end a recording.

Your account might also be configured for automatic or system-guided recording. If this is the case, you receive a notification that recording is in progress.

Lesson: Recording a voice interaction

Purpose: To record a voice interaction to be reviewed later by your administrator or supervisor.

Prerequisites

- You are logged in to Workspace (see [Lesson: Going Ready in the Workspace Main window](#)).
- You are handling a voice interaction (see [Handle A Voice Call](#)).

Start

1. To start the current voice interaction with a contact or an internal target, click **Record the Call** on the toolbar in the Voice Interaction window or in the Interaction Bar on the Main Window (). When you are recording a call, the color of the call icon in the connected-parties area changes to red:

2. To control the recording of the call, use the call-recording control buttons and drop-down menu:

- To pause the recording of the call, click **Pause Recording the call** (.
- To resume the recording of the call after you have paused, click **Resume Recording the Call** (.

3. To stop the recording the call, open the call-recording control menu and select **Stop** (). Call recording stops and the color of the call icon in the Call Status area changes back to blue. The file that

contains the contents of the recording of the session is stored on your system network.

End
