Support for RHEL 64-bit Platforms

Installers support installation of Red Hat Linux 64-bit platforms only when RHEL standard compatibility packs for 32-bit platforms have been installed. These packages have generic names like:

Important

The 32-bit compatibility packages are no longer available for RHEL 8. So, these packages must be taken from the RHEL 7 distributive files.

- compat-glibc*
- compat-libstdc++*
- libstdc++* '

You might also need to ensure that the `JAVA_HOME` variable points to the correct JDK.
