Integrated Capture Points Guide

Configure Web Service Capture Point for HTTPS

5/10/2025

Configure Web Service Capture Point for HTTPS

In a Web Service Capture Point application, named, for example, WSCP_812_zoo, set the following options:

- server-key-file=<Path to wscpserver.pem>\wscpserver.pem
- password=<'PEM pass phrase' for wscpserver.pem>
- protocol=https
- require-client-authentication=true
- cacert-file=<Path to wscp_clients.pem>\wscp_clients.pem

Do not change any other options.

If client authentication is not required, set the option require-clientauthentication to false and omit all procedures relevant to **generation and manipulation of client certificates**.
