[HTTPS for WS CP Java Client](#)

HTTPS for WS CP Java Client

Assuming that all of the **procedures of generating, exporting, and importing certificates** have been completed, the following modifications are required for a Java client to run over HTTPS:

1. Update the URL of WebService or WebService Stub by replacing http with https.
2. Start your client with the following JVM options:
 - `-Djavax.net.ssl.keyStore="<Path to keystore.jks>/keystore.jks"`
 - `-Djavax.net.ssl.keyStorePassword="<Key store password, set when creating the keystore>"`
 - `-Djavax.net.ssl.keyStoreType=jks`
 - `-Djavax.net.ssl.trustStore="<Path to keystore.jks>/truststore.jks"`
 - `-Djavax.net.ssl.trustStorePassword=<Trust store password, set when creating the truststore>"`
 - `-Djavax.net.ssl.trustStoreType=jks`
