Genesys Knowledge Center Deployment Guide

Sample UI

5/6/2025

Sample UI

Overview

Knowledge Center comes with a Sample UI, hosted on a sample website, which provides basic access to your installation of Knowledge Center and your configured knowledge base content. You can use it to test and demonstrate what Knowledge Center can do or as an example of how to integrate Knowledge Center access into your existing website.

The Sample UI is based on independent and easily configurable components. Its website was created using Bootstrap and works on all web browsers that support Bootstrap. See the Bootstrap documentation for details.

After you install your Knowledge Center Servers and configure the Knowledge Center Cluster, you can access the Sample UI sandbox via the following URLs:

- If you have configured a load-balancer for your cluster: http://host_load_balacer:port_load_balancer/gks-sample-ui
- If you use a Knowledge Center Cluster with a single node: http://gkc_server_host:gkc_server_port/gks-sample-ui

The Sample UI is pre-configured to show all Active and Public knowledge bases configured in Knowledge Center Server in language en (English).

Authorizing

You can use the Sample UI to:

• Browse the site, either as an anonymous user or by authorizing yourself as a customer. To authorize, click the **Log in** link, enter your credentials, and click **Confirm**

Important

This is not a real site authorization, as Knowledge Center server will only use an email as a *customerld* to identify sessions in History records.
