User's Guide

Adding a New Bundle Set

Adding a New Bundle Set

1. To add a new bundle set to your system, you must first create a new bundle file.
 - The `lrm_bundle_set` ID and bundle ID must be unique.
 - The `valid_from` date should not be earlier than the date you choose to import your bundle.
2. Browse to the destination location of your LRM application.
3. Upload the new bundle file using the GAX wizard.

The information from the Bundle File is imported into the Configuration Server and the new user-defined bundle is added to your system where it is now included in calculations and reports.
