[Start on Remote Resource](#)

Start on Remote Resource

The following SCXML strategy requests that a specific dialog be started on a specified interaction by a new remote resource.

```
<scxml version="1.0" xmlns="http://www.w3.org/2005/07/scxml"
  xmlns:queue="www.genesyslab.com/modules/queue"
  xmlns:dialog="www.genesyslab.com/modules/dialog"
  initial="initial">
  <state id="initial">
    <transition event="interaction.added" target="dialog" />
  </state>
  <state id="dialog">
    <onentry>
      <dialog:remote destination="'123456'" default="'2334'" />
    </onentry>
    <transition event="dialog.remote.done" target="exit" />
    <transition event="error.dialog.remote" target="error" />
  </state>
  <final id="exit" />
  <final id="error" />
</scxml>
```
