Orchestration Server Developer's Guide

Cancel Invoked Session

4/9/2025

Cancel Invoked Session

The invoked SCXML session is cancelled if the invoking session exits the state where the invocation is made without waiting for an invocation-completion event, as shown in the sample below.

```xml
<scxml version="1.0" xmlns="http://www.w3.org/2005/07/scxml"
       xmlns:queue="www.genesyslab.com/modules/queue"
       xmlns:dialog="www.genesyslab.com/modules/dialog"
       initial="initial">
  <state id="initial">
    <transition event="interaction.added" target="invocation"/>
  </state>
  <state id="invocation">
    <invoke
    src="'http://localhost:9090/strategies/01_BASIC/_aux/CheckInvokeCancel.xml'"
    type="scxml"/>
    <transition event="invoked" target="routing"/>
    <transition event="error.invoke.invocation.*" target="error"/>
  </state>

  <state id="routing">
    <onentry>
      <queue:submit priority="5" timeout="20">
        <queue:targets type="dn">
          <queue:target name="'7102'"/>
        </queue:targets>
      </queue:submit>
    </onentry>

    <transition event="queue.submit.done" target="exit">
      <log expr="'DONE'"/>
      <log expr="_genesys.ixn.interactions[0].voice.ani"/>
      <log expr="'DONE'"/>
      <log expr="_event.data.targetselected"/>
    </transition>
    <transition event="error.queue.submit" target="error"/>
  </state>

  <final id="exit"/>
  <final id="error"/>
</scxml>
```
