Each performance metric can be enabled for each of the three configurable Time Profiles. The time profiles can be set to any integer from 1 to 1440 and are not confined to a specific set. These time profiles can be Sliding or Growing, with any interval desired. (Genesys recommends that the time interval should divide an hour or day evenly.)

Each of the statistic templates defined below specifies the following values:  
DBAppSpecificIdColumnName: patternNum

Filtered metrics are disabled by default. For information about enabling filtered metrics, see [Pulse Advisors Deployment Guide](#).
