TAgentSetIdleReason

5/8/2025

Contents

TAgentSetIdleReason

Description

> **Warning**
> This function is obsolete.

Sets the `idle reason` code for the telephony object specified by the parameter dn.

Parameters

Name	Description
server	Local server handle to the T-Server in question.
dn	Directory number of the telephony object that is requested to be set to idle.
idle_reason	A pointer to the string that contains the idle reason.
reasons	A pointer to a data structure intended to provide additional information associated with this action.
extensions	A pointer to an additional data structure.

Return Values

Standard (standard-return-values.)
