TKVListBinaryValue

Description

Returns the value (of binary type) of the key-value pair specified by the parameter `pair`.

Syntax

```
unsigned char TKVListBinaryValue(  
    TKVPair *pair  
);
```

Parameters

For basic type information for each parameter, consult the Syntax section, above.

Name	Description
<code>pair</code>	A pointer to the key-value pair that contains the value in question.

Return Values

The value of the parameter contained in a key-value pair specified by the parameter `pair`.
