Platform SDK Developer's Guide

TKVListDeleteAll

12/19/2025

Contents

TKVListDeleteAll

Description

Deletes all data from the data structure specified by the parameter `list`.

Syntax

```
TKVResult TKVListDeleteAll(
        TKVList *list
        );
```

Parameters

For basic type information for each parameter, consult the Syntax section, above.

Name	Description
list	A pointer to the data structure from which all data should be deleted.

Return Values

Refer to the type TKVResult.
