Contents

TListenDisconnect

Description

On an existing conference call, sets Deaf mode for the party specified by the parameter `listener_dn`. For example, if two agents wish to consult privately, the subscriber may temporarily be placed in Deaf mode.

Parameters

Name	Description
server	Local server handle to the T-Server in question.
dn	Directory number of the telephony object on whose behalf this request is made; must be a party in the specified call.
listener_dn	Directory number of the telephony object that is requested to be set to Deaf mode.
conn_id	Connection identifier of the call from which the telephony object is requested to be released.
reasons	A pointer to a data structure that provides additional information associated with this action.
extensions	A pointer to an additional data structure.

Return Values

Standard (See standard-return-values.)
